## Introduction

Congratulations on your purchase of a cellular telephone from Motorola, the world leader in cellular technology
All Motorola cellular telephones are manufactured to exacting specifications and world-class quality standards, and are designed to withstand the harshest environmental conditions. Our commitment to Total Customer Satisfaction and over sixty five years of experience in personal communications mean you can depend upon the quality of this Motorola product.
 mplexity of cellular communications by guiding you through the features and presenting you with smple choices every step of the waj. Pesseaity also allows you to personalise the way you use your phone - for example, different ringer tones, a phone book and network selection preferences - all presented with clarity and simplicity. In this manual, each of the Pessonality ${ }^{\text {TM }}$ features is identified with an $\mathbb{X}$ symbol to indicate that it is customisable to meet your requirements.
This cellular telephone has been designed for use with the worldwide GSM (Global System for Mobile communications) network. By using digital communications methods, your phone provides a number of advantages over traditional cellular systems:

- Superior speech quality is attained without the usual background noises and interference
- Your conversation may be encrypted for security. Conversations cannot be eavesdropped using scanning equipment when the signal is encrypted.
- You are not restricted to use within one country.

Your subscriber number is not contained within the phone as with other systems. Instead, a 'Smart Card known as a SIM (Subscriber Identity Module) is supplied by your Cellular Service Provider. All call billing is made to the subscriber number on the card whether it is used in this or any other GSM unit.

$\qquad$ -

## Getting Started

In order to get started straight away with your new GSM StarTAC, follow these simple steps:

## Charge the Battery

I Before you use your phone, please see the 'Your Battery section for important information on battery charging.
1 Remove the battery from its holder and clip it into your phone

2 Connect the travel charger to the phone and plug it into a standard mains socket.

## Powering On

1 Insert the SIM card into the slot in the base of your phone
2 Fully extend the antenna.
3 Open your phone and press to switch on.
4 If prompted, enter your PIN code and press
Once a GSM network is located by your phone, it connects and the network name appears on the display.

## Making a Call

1 Enter the number you want to call.
Leven if you call a local number, you must also enter the full area (but not country) code.
2 Press Your call is placed!
IMPORTANT! Ending a Call
When you have finished your conversation, you must end the call, even if the other person terminates the call. To end the call, press or close the phone.
Tol If you do not end the call, you will remain connected and you will be charged for the duration of the connection.

## Exploring

Now you can leave your phone on while charging the battery, Now you can leave your phone on while charging the battery,
making and receiving calls, and exploring features of your phon at your leisure.

## Your Battery

## Charging a New Battery

New batteries are supplied in a totally uncharged state.
To ensure maximum battery performance, a new battery (or battery that has not been used for several months) should be charged for at least 14 hours before use.

1. A new battery will require several full charge/d
in order to achieve its optimum performance.

L A new battery, or a battery that has not been used for several months, may cause a premature fully charged indication.
Ignore this indication and let the battery charge for severa more hours, remove and re-insert the battery into the charger and charge for an additional 14 hours.

## Battery Design

Your phone is capable of carrying two batteries: the Main and the Auxiliary battery. These batteries complement each other because as the phone drains one battery, it automatically ng an active ca

## mportant Battery Information

I Always treat your batteries with care. See 'Battery Safety, at the beginning of this manual.
I Never leave your battery in extremely high temperatures (over $60^{\circ} \mathrm{C}$ ), for example behind glass in very hot, direct sunlight.
battery to it's fullest capacity:

- For the best results, Li-lon batteries should be charged using the Desktop Charger.
- The battery should be at or near room temperature when
charging.
About Your Phone, Battery and SIM Card
 the battery terminals, thereby reducing the risk of injury or
damage from a battery short circuit
Removing the Main Battery Cover
1 Press and hold the release catch.
2 Press the battery upwards, out of its cover
Fitting the Main Battery Cover
1 Lower the side of the battery opposite the release catch into the cover.
2 Lower the side of the battery with the release catch into the cover, until the catch clicks into place.
Removing the Auxiliary Battery Cover
1 Hold the battery securely with one hand.
2 With the thumb of your other hand, press the base of the cover upwards. Continue this action until the cover slides free of the pins on the bottom of the battery.
3 Swing the cover away, clear of the batter.
Fitting the Auxiliary Battery Cover
1 Slide the narrow end of the cover into the small grooved hook on the top of the battery.
2 Push the cover firmly upwards until the base of the cover slides past the battery pins; then release.

English
18 About Your Phone, Battery and SIM Card

## Battery Performance and Maintenance

- Best battery performance will be achieved when you regularly charge and discharge batteries as instructed in this manual.
- Battery performance is greatly affected by network coverage
- Set Eatters Seving Mode to On (see 'Phone Setup Menu' and/or Frequency of Search to Slow or Medium (see 'Network Selection Menu'
- Keep the antenna fully extended whenever possible to ensure maximum signal strength.
- If left unused, a fully charged battery will discharge itself in approximately one month.
When not in use, store your battery uncharged in a cool, dark and dry place.
$\qquad$

## Low Battery Warning

When the battery level is low and only a few minutes of talk time
remain, a warning signal (two double beeps) will sound, the
border of the battery symbol will begin to flash, and Low
Ettery will be displayed.
When the battery is completely discharged, your phone will turn off.
If you have an auxiliary battery fitted, it is used before the main battery. A tone sounds when changing to the main battery.
Charging Your Battery Using the Travel Charger
The travel charger can power the phone and charge a fitted
battery.
I Ensure that the local mains voltage at your location matches that of your travel charger.
Fit a battery onto your phone. See 'Fitting a Battery to Your Phone', later in this section
To charge your battery:
1 Attach the correct adapter plug to the travel charger.
2 Connect the travel charger to the phone.

3 Insert the travel charger plug into a suitable mains powe socket.
A beep-tone is heard and the battery icon flashes when charging begins.
Your phone can be either on or off during charging
The state of charging is monitored and displayed by your phone. See 'Battery Indicators' later in this section for details.

## Desktop Charging Your Battery

Batteries charge in about 2 to 3 hours, depending on the battery.
asilt is normal for batteries to become warm during charging.

## Desktop Charger Power Supply

1 Connect the travel charger to the desktop charger socket.
2 Plug the travel charger into a standard mains socket.

About Your Phone, Battery and SIM Card

## Inserting Your Phone into the Charger

Insert your phone into the desktop charger as shown.

## g

## Inserting a Spare Battery into the Charger

A spare main battery or an auxiliary battery can be charged on its the desktop charger as shown.

${ }_{L T}$ For maximum NiMH battery charging, you should double the charge time.
Charge times will increase if you make or receive phone calls while charging.

## Fitting a Battery to Your Phone

ated in the following diagram, and snap-lock it into place

Fitting an Auxiliary Battery
1 Place the hook on the battery into the slot on the back of the Place the
phone.
2 Pull the battery towards the bottom of the phone until the two catches click into place.

## Your SIM Card

Your credit card sized SIM (Subscriber Identity Module) card is supplied by your Cellular Service Provider when you buy your phone. You will not be able to make or receive calls without a SIM card inserted in your phone.
L. Some networks allow you to make emergency calls without a SIM card inserted.
The SIM card is a 'Smart Card' that contains your phone number senvice details and memory for storing Phone Book numbers and messages. You can therefore use your SIM card in someone else' GSM phone and you will be charged for the call.
Like a bank or credit card, you should keep your SIM card secure. Do not bend or scratch your card and avoid exposure to static electricity or water.
【 Switch off your phone before inserting or removing the SIM card. Failure to do so may damage the memory on your SIM card.

English
22 About Your Phone, Battery and SIM Card

## Making and Receiving Phone Calls

## Switching the Phone On and Off

To switch the phone on or off press and hold . If VibraCall is selected, the phone will vibrate when it is switched on.
If the phone displays Insert. Card, there is no SIM card inserted. Once inserted, the phone will check that the SIM card is valid.
A number of messages may appear:

- Enter PIN - a request to enter the SIM card PIN code (if required).
- Enter Fhone Uniock code - a request to enter the phone unlock code (if required)
Searching... followed by a network name - as the phone finds a suitable network to connect to.

## Entering Your SIM Card PIN Code

To enter the PIN code, enter PIN Code
As you type in each digit of the PIN code $a *$ character will be displayed.
If you make a mistake, press $\longrightarrow$ to remove the last digit. Holding down will remove the entire entry
When the PIN code is complete press

If the P IN code is incorrect, the message lima PIU will be displayed, followed by Enter. FIN.
IIf an incorrect PIN number is entered three times
consecutively, your phone will automatically lock-up and the llocked message will be displayed. See 'Unblocking Your Phone for detail
To change the PIN code, see 'Change SIM PIN Code' in the $U$ sing the Options Menu.

## OK Entering Your Unlock Code

If your phone displays the message Enter. Fhone Unlock.
Code you must enter your unlocking code by entering Unlock
The unlock code is a four digit number, initially set to 1234. To change the code, see 'Change Unlock Code' in the Using the Options Menu.
If you forget your unlock code, press . This will display the 'Change Unlock Code' option. Enter Security Code, enter new unlock code, and press

## Making a Phone Call

To make a phone call, your phone must be switched on, unlocked and have the antenna fully extended.
It will not be possible to make a phone call unless you are in an area where there is GSM service. When a service has been found
a series of rising bars, There are a number of ways to make a phone call:

- Using the digit keys.
- Using automatic redial
- Dialling numbers from the Phone Book*:
using onetouch (turbo) dialling,
using an entry from a location,
using an entry of a name,
using one of the last ten numbers called.
- Calling an embedded number in a message.
- ${ }^{2} *$ Your phone contains a 'phone book' that can be used to Pour phone contains a' 'phone book' that can be used to
store names and telephone numbers. See OX What is the Phone Book? for further details.

English
24 Making and Receiving Phone Calls

[^0]
## Phone Book Dialling

## OX One Touch (Turbo) Dialling

To quickly retrieve and dial a number stored in the first nine locations of your Phone Book․, press and hold the appropriate digit key. For example, pressing and holding Tris You do not need to press to call the num

## By Location

1 Press and a location number. For example
will retrieve the number stored in location 23 of the Phone Book.
If you don't know the exact location, enter a random location and then use and to scroll to the number. Location
2 Press to call the number

## By Name

You can also dial a number in the Phone Book associated with a name entry
1 Press the Smart button.
2 Scroll through the alphabetically-listed names using either the volume up/down buttons, or and . To return to the first entry, press the Smart button again
3 Press to call the number of the selected name.
Lif If you inadvertantly press the Smart button, press and hold exit the Phone Book.

[^1]
## Last Ten Calls

2 When in standby mode, press and scroll through the numbers. Press to make the call.
Alternatively, you can retrieve the last number dialled using the 'Last Ten Calls' feature in the Phone Book menu.

Calling an Embedded Number in a Message Details on how to call a number embedded in a message are given in the Messages Menu section.

## International Phone Calls

To make an intemational phone call press and hold the
key. After a couple of phone call press and hola the will appear in the ispeconds the intemational dialing prefix + without knowing the local international access code
Now enter the country code, followed by the phone number. The country code follows the conventional format, 49 for Germany, 44 for the UK, 46 for Sweden, etc.
Just like a conventional intemational call, remove the leading ' 0 ' of the area code when you dial.

## Inserting Pauses Into Phone Numbers

To obtain a three second 'pause' character in a phone number, press and hold for a couple of seconds, the pause symbol io will appear
This symbol produces a three second delay whenever it is used. However, the first pause character in a phone number is a special case: it allows the call to be answered before dialling the remaining digits.

## Pause - A Working Example.

If, for example, if you have a tone-based voicemail system on 555-6911, with a mailbox number 1066 and password 2001 Then you may dial the following number: 555611 1066"2001
The first part of the number is used to call the voicemail system When the call is answered the first pause will produce a delay of three seconds before the tones for 106E are sent to select the mailbox
There will be a second pause of three seconds before the tones for 2001 are sent as the password.

## GSM Emergency Calls

The worldwide GSM network provides a standard number, 112 to dial in cases of emergency.
Provided that your phone has found a network, you will be able to make an emergency call. The call can be made regardless of
to make an emergency call. The call can be made regardiess without a SIM card inserted.
The emergency call will be directed to a central emergency operator.

## dial the GSM emergen 9 number, pres

$\rightarrow \longrightarrow$
While the emergency call is being made and connected, the display will show Emer Eenc: Callime.

English
26 Making and Receiving Phone Calls

## Receiving a Phone Call

To receive a phone call:

- Your phone must be switched on and unlocked.
- You must be in an area where there is GSM service.
- Your Call Diversion and Call Barring settings should not be set to divert or bar incoming calls.
hen your phone receives a call, it will ring or vibrate. To answe the call, extend the antenna and then open the phone. If your number or name will be displayed, depending on your Phone Book entries.
Your phone automatically searches in the Phone Book for the caller's number. If the number is found, then the name entry associated with the number is displayed. If the number is not found, or if it is but there is no associated name in the Phone Book, then the caller's number is displayed.
Normally, the call is answered as soon as the phone is opened. However, if the Key Answer Only option is selected, opening the phone will not answer the call - you will have to press a key. When the identification is displayed, you can decide whether or not to answer the call by pressing , a numeric key (1 to 9) or - To set this option, see 'Key Answer Only'. You can also answer using the keys if the phone rings whilst the phone is already open.

If your phone is open and you do not want to answer the call,
you can:

- Press and release river to a forwarding number or hears
busy tone, depending on your features settings.
or
- Press and hold . This will reject the incoming call. No call divert option will be offered in this case
If your phone rings and you do not answer it, the message
Unansuer ed will be displayed the next time you open the that you know some tried to call you.

## Ending a Phone Cal

to end a phone call, press or close the phone.

## Security Features

You may find that you are prompted to enter certain security or access codes before you can use your phone or some of its features. These codes are:

- PIN Code (SIM card PIN code)

Prevents access to your SIM card. The number is supplied by your service provider. Your SIM card will be blocked if three unsuccessful attempts to enter this number are made.

- PIN2 Code.

Prevents access to certain advanced features. The number is supplied by your service provider.

- Unlock Code*.

Protects your phone from unauthorized use. The default code is 1234 .

- Unblock Code.

Unblocks your SIM card if it has been blocked by three unsuccessful attempts to enter the PIN code. The number is supplied by your service provider

- Security Code.

Prevents access to security features. The default code is 000000 .

## Menu Navigation

A large number of your phone's options are accessed by using cancellation
Please read this section carefully before attempting to access a menu option. When you understand the common approach to menu navigation and how the menus are shown, you will be able to access and change options with ease
The menus described here can only be accessed when the phone is in the standby mode. Menu operation is not possible when you are making or answering a phone call.

## Entering the Menus

Two different keys are used to access the menus:
accesses the Options men
accesses the Options menu.
accesses the Quick A $\qquad$ keys in a common manne keys in a co

## Leaving the Menus

To leave any of the menus, you can either press and hold or repeatedly press Both of these actions will return your phone to the stand-by mode.
Alternatively, a quicker way to leave the menus is to press

## Menus and Sub-menus

A menu is a simple list of options. Some of these options provide access to a further list of options called a sub-menu. When navigating through the menus you may find it helpful to think in terms of menu levels - the 'parent' menu being on one level and its sub-menus being on a lower level.

## Moving to and Selecting a Menu Option

To move from one option to another on the same level, use the scroll keys: and scroll forwards and scrolls backwards. When you find the option you want, select it.
Depending on the option you select, one of three things will
happen:

- either a brief message will be displayed confimming an action, for example Completed.
- or a prompt will be displayed requesting you to enter information, for example Enter FIN or Enter Hame.
- or the first option of a sub-menu will be displayed. You can or the first option of a sub-menu wiil be displayed. You can
select this option using or browse through the other options using the scroll key
To leave an option or sub-menu, press . This will take you

## back to the parent menu item

## Menu Options with Security Codes

some options are protected from misuse by requiring you to enter one of the security codes. In order to use these options, you must enter the requested code before proceeding.

## Menu Navigation - A Working Example

## The following steps will take you through how to switch the

Extended Menus option on:
1 When the phone is in the stand-by mode, press .This will access the Options menu and Fhone Eook will b
displayed. displayed.
2 press three times to go to the Fhone Setur menu
item.
3 Press to select the sub-menu. The display will now show the Fdjust Rime Volune menu option.
4 Press repeatedly until the Extended Menus sub-menu item will be displayed.
5 Press to select this item. You can now select between On or Off, the current setting will be shown with a character. If the / character is next to Off, press and then to switch Extended Menus on. If the $\checkmark$ character is next to On, press to leave the setting as it is.

## OXX Personalising the Menus

With Pesconality ${ }^{\text {m" }}$ you can personalise the menus by choosing
which features you want readily available. Less frequently used
features can be stored out of sight. The menu diagrams in this manual show the default conditions of the menu settings when
you first receive your phone.

- Short menus contain those items which are used most often. The default items are shown in bold type in this manual
- Extended menus contain those items which are used less You can change which items are active in the short and extended menus. In this way, you can decide which items are displayed as you scroll through a menu
To move anitem from short menu to the extended menu (or from the extended menu to the short menu), select the item and hold down until a prompt appears offering the following choices:
- Remove From Short (Extended) Menus
- Leave in Short (Extended) Menus

Select the option you want by pressing
T\$T The settings for some menu features cannot be changed.

## Using the Options Menu

OXW What is the Phone Book?

You can store names and telephone numbers as entries in an electronic 'Phone Book'. These entries are stored in the Personal Numbers list in your phone or SIM card's memory, and in the Fixed Dial list ${ }^{1}$ on your SIM card. Once stored, a number can be quickly retrieved and dialled.
Your Phone Book storage capacity is as follows:
 Fixed dial numbers None Phone number digits 32 Name characters
Locations
SIM card
provider.

## Postscripting

This allows you to make use of area codes and other prefixes previously stored in your Phone Book when making a call. To use postscripting, select the Phone Book entry containing the prefix and then simply enter the rest of the number and press to make the call.
You can also use postscripting if you want to call a number similar to one you have stored in your Phone Book. Retrieve the number from the Phone Book, delete the relevant digits and the Por Postscripting a number does not overwrite the entry in the Phone Book.

## OXX Call Diverting

Call diverting is a network feature. If your phone is unavailable,
or you do not wish to receive calls, incoming calls can be diverted to other phone numbers.
This option can be used to

- Divert all incoming calls unconditionally.
- Divert incoming calls whenever your phone is unavailable.
- Divert calls to different numbers, depending on the call type
and the current status of your phone.
- Reset all diversion options to off.

Q You cannot change the call divert settings when you are out of GSM coverage.
After selecting any of the call divert options there will be a short delay while the phone asks the network for the current setting.

## Divert When Unavailable

This option will enable you to divert all incoming calls to a single
number, whenever your phone is unavailable.
The option has two settings, On or Off
If you change the setting to On, you will be asked to enter a diversion phone number using the digit keys.
When On, Divert When Unavailable takes priority over detailed diversion settings.
Divert All Calls
This option will enable you to unconditionally divert all incoming calls to a single number
The option has two settings, On or Off.
If you change the setting to On , you will be asked to enter a diversion phone number using the digit keys.
(8)- When On, Divert All Calls takes priority over all other diversion settings.

## Detailed Diverting

These options will enable you to divert calls to different numbers depending upon the call type and the current status of your phone.
Each of the following detailed diverting options operate in the same way.
Each option has two settings, On or Off
If you change the setting to On, you will be asked to enter a diversion phone number using the digit keys.
Le Detailed diversion settings are ignored while Divert All Calls or Divert When Unavailable are On
Divert Voice Calls
Divert all Uoice Calls
When selected, this option will unconditionally divert all incoming calls. You will have no opportunity to answer an incoming call.
If Buss
This option will divert incoming calls if your phone is busy
If Ho Anewer.
This option will divert incoming calls if you do not answer the call.
If Not Reachable
This option will divert incoming calls if your phone cannot be contacted by the network.

English
44 Using the Options Menu

Divert Fax Calls, Divert Data Calls
When selected, these options will divert incoming 'Fax' and 'Data' calls.

## Cancel All Diverting

This option will enable you to cancel the diversion of incoming calls.
【 This option resets all diversion settings to off and removes al diversion numbers.

## Talk and Fax

This is a network feature that allows you to speak and then send or receive a fax during the course of a single call, using a PC (PCMCIA) card. Refer to the Accessories section for more information about the PC Card.
to 9600 bps.
Before making a Talk and Fax call, ensure that:

- Your phone is "fax-ready" (it has been switched off, connected to the PC card, then switched back on). Connecting your phone to the PC card in the middle of the call will not work.
- The Talk and Fax mode is set to On.

A Talk and Fax call automatically switches to fax mode when you start sending the fax. While the fax is being transmitted, the start sending the fax. While the fax is being transmitted,
message FF.x in Frogress will be displayed. The call automatically ends when the fax transmission is complete. You cannot switch back to voice mode in the same call. Wis While a Talk and Fax call is active, Call Waiting is suspended.
$\qquad$
-

If you receive a Talk and Fax call when:

- Your phone is not fax-ready - you can only talk.
- Your phone is fax-ready but Talk and Fax mode is off - the call is automatically routed to your fax (you cannot talk).
On
Switches Talk and Fax mode on for the next and all subsequent calls.
Off
Switc.
calls.

## OK Call Holding and Call Waiting

Your phone supports the GSM network options of Call Holding and Call Waiting. Using these options you can place a current call.
The Call Waiting menu item has two settings On or Off. If you select Off, you will be not be notified of waiting calls. The person trying to contact you will either receive the busy tone, or be
diverted by the 'Detailed Diverting - If Busy' option.
If Call Waiting is On, you will be notified of a waiting call by an audible alert and by the message Cill Witing You can press to accept the waiting call, or us If you have Caller Line Identification, the caller's number or name is displayed instead of the Call Waiting message.

Call Holding and Call Waiting Scenarios
The display will automatically change according to the status of your current call (or calls) and will propose the option that you are most likely to want. Press to accept this option or press to scroll through the altermative options. By following this procedure you will find that even the triple combination of an
active call, a held call, and a call waiting is easy to manage.
owing points summarise the more common situations

- To end the active call, press . If you have a call on hold it is automatically connected
To put the active call on hold and make another call, press and select the Hold Call option, then
again and select the Make Hew Call option ${ }^{1}$.
- To put the active call on hold and reconnect a held call, press and then select the Suitch Cells option.
- To accept a waiting call, press . The active call will be placed on hold. If you prefer to end the active call before accepting the waiting call, press and select the End accepting the waiting call, press Held select the Er
Act.ive Call option, or End Held Call option as appropriate.
- To reject a waiting call, press $\square$ and select the Reject. Cell Waiting option (or simply press select

Using the Options Menu

Wo If you have an active call, a call on hold and a call waiting, you cannot accept the waiting call until you end either the active call or the held call.

## Call Holding and Call Waiting Messages

During Call Holding and/or Call Waiting operations, your phone
may display one or more of the following messages Truing
A request to hold the active call, or swap the active call with a held call, has been made.
or
A request to reconnect the held call has been made Hold Failed
The request to hold a call has been unsuccessful.
Canot Hold Second Call
A call is already on hold, you cannot place two calls on hold at the same time.
Recomect Failed
The held call could not be made active again
Busy Try Later
Your phone is still working on a previous command. Wait a short time before repeating the command.
Anonumbers
The person who is calling you has blocked their number from appearing on your phone.
Unvuailable
The network is unable to provide the caller's number.

## ok Call Barring

Call barring is a network feature which can be used to selectively bar outgoing and incoming calls.
If you change the barring setting, you may be asked to enter your barring password. There will be a short delay while the phone notifies the network of the new setting. When the change has been made by the network, the phone will display a confirmation message.
The initial password will be supplied to you by your Cellular Service Provider when you subscribe to this service.
This option may be affected by the Fixed Dialling setting.

## Bar Outgoing Calls

After selecting this option, there will be a short delay while the phone asks the network for the current setting.

## Int'l Calls

When selected, this option will bar outgoing international calls.

## Int'I Calls Except Home

When selected, this option will bar outgoing intermational calls, except those to your home country.

## All Calls

When selected, this option will bar all outgoing calls, except emergency calls.
Off
When selected, this option will disable all call barring for outgoing calls.

46 Using the Options Menu
stac85en.bk : opt_menu.fm5 Page 47 Wednesday, January 28, 1998 9:06 AM

## Bar Incoming Calls

After selecting this option, there will be a short delay while the
phone asks the network for the current setting

## When Roaming

When selected, this option will bar incoming calls when you are roaming.
You may wish to select this option, as some Cellular Service
Providers charge an additional fee for receiving calls when you
are roaming.
are roaming
All Calls
When selected, this option will bar all incoming calls.
Off
When selected, this option will disable all call barring for incoming calls.

## Change Bar Password

This option can be used to change the call barring password.
After selecting this option, you will be asked to enter the current password.
You will then be asked to enter, and then re-enter, your new, 4 digit, barring password. When the change has been made by the network, the phone will display a confirmation message.

## Key Answer Only

## This feature has two options: On or Off

When set to On, this feature allows the phone to be opened without answering an incoming call. This means that if your network supports Caller Line Identification, you will be able to review the number or name of the person who is calling you before deciding whether or not to answer it. The call can be or ${ }^{\text {a }}$. To reject the call, press .
When set to off, opening the phone answers an incoming call.
$\qquad$

## Messages Menu

and How to Use Them
Your phone supports the two GSM message features: Short Message Services (SMS) and Cell Broadcast.
SMS Messages
These are text messages that are sent specifically to and from your phone number.
When an SMS message is received, your phone
1 Makes three short alert tones (depending on the 'Ring or Vibrate' setting)
2 Displays the $\square$ (messages) icon
3 Stores the message for later viewing, if there is space. If there is not enough space, the icon will flash. One or more messages must be removed before the message can be stored.

Your Celluar Service Provider will transmit a message for a limited amount of time. If a memory location is not made available before the message is removed from the network, then you will not be able to receive or read it.

48 Using the Options Menu
stac85en.bk : opt_menu.fm5 Page 49 Wednesday, January 28, 1998 9:06 AM

## Cell Broadcast Messages

These are general messages, broadcast to a group of phones and can only be received when your phone is in standby mode. These messages are broadcast in numbered 'channels' and, in general, each channel will tend to carry one particular type of information.
Typical cell broadcast channels could have information on local weather conditions, traffic reports or stock market prices. Please contact your network operator for a list of available channels and the information they supply
When the message has scrolled across the display, the beginning of the message will be shown until you either remove it or a new message arrives.

## How to Read SMS Messages

You can use the scroll keys ( and ) to scroll through messages in either the Received Messages or Outgoing Messages lists.
To display a specific message, enter the message number, for example press to display the 5 th message. If the messag does not exist, Inval id Mse Humber will be displayed.
Altermatively, to display the next message, press and select Go To Hext Messase.

## How to Create and Edit SMS Messages

Use the Message Editor to create or modify text messages. When you enter the editor, the last message that was edited will be displayed. Press and hold to clear the message and start a new one, pres hes 'How to Enter Alphabetic Charanation of the OWhat is the Phone Book? section the $O$ What the Phone Book? section.
Press once you have completed your message. You will then be presented with the following options:
Send messee - If you select this option you will be
prompted for a phone number, enter the number and then press to send the message.
Store Messiee - Select this option to store your edited message in your Outgoing Messages list.
L. IF If you don't tore the message after it has been edited, you will lose all your changes as soon as you select another

## message to be edited.

## OW Call Voicemail

Once selected, this option will leave the Messages menu and automatically make a phone call to the current voicemail number. The display will show Cilling and standard call operations can be performed.
The voicemail phone number can be entered by selecting the 'Voicemail Number' option in the 'Message Settings' sub-menu.

## Received Messages

This option is used to view and manage any SMS messages that have been sent to your phone number.
When selected, this option will display a message indicating the total number of messages and how many of these are new. If there are no messages $H 0$ Hesseges will be displayed.
If there are messages, the new messages will be displayed first, followed by the old. Repeated presses of will display the whole message, when it was sent and the phone number who sent it (if available).
Once you have read a new message it will automatically become old.
See 'How to Read SMS Messages' for more information on navigating through the messages.

This option allows you to change or disable tones you hear when you press a key.
The option has three settings, Wormel Tones, Simele Tone or Ho Tones.
$\qquad$ -

## Phone Status

## Status Review

This option can be used to view the current setting of menu options.
When selected, your phone will display the list of menu items that you have changed from the default setting.

## Master Reset

■ This option should be used with caution.
This option is used to restore certain phone options to their original settings.
When selected, you will be asked to enter the security code.
When selected, you will be askered, the master reset option will perform the following
operations:

- Cancel Automatic Answer, Audible Call Timers, In-Call D Handsfree, Automatic Lock, Cell Broadcast and Talk and Mode.
- Return Language Selection to Original.
- Restore Keypad Tones to Normal, Ringer Tones to Standard, Volume Level to the middle of its range and Network Search frequency to Medium.
- Reset the expiry period for SMS messages to 24 hours and the Message Type to Text.

Master Clear
IThis option should be used with extreme caution, for example it will clear all the Phone Book entries from your phone memory.
This option is used to restore certain phone options to their original settings.
When selected, you will be asked to enter the security code. Once entered, the master clear option will perform the same operations as 'Master Reset', plus the following operations:

- Clear the Phone Book entries from phone memory (not from SIM memory)
Clear the Last Calls Made and Last Calls received lis
- Clear the Message Editor.
- Reset the Resettable Call Timers.

Master Clear does not clear the:

- Fixed Dial list
- My Number(s) list
- Charge Meters
- Received and Outgoing Messages list.

## Network Selection Menu

## Network Selection

In order for the phone to make and receive phone calls, it must register with one of the available networks.
Your phone automatically searches for the last network used. If, for any reason, this network is unavailable, your phone will attempt to register with a new network.
When your phone needs to register with a new network, it will generate a sorted list of networks. The network list is sorted in the following order:

- The Home network.
- Networks from a preferred list
- A random list of other networks found above a certain signal strength.
- All remaining networks in descending order of signal strength. Any forbidden networks, stored in the SIM card, will not be included in the sorted list

## Available Networks

When selected, this option will scan to see which networks are operating in your current location. When you see a network you
wish to register with or store in your preferred list, press
You will now enter the 'Register Now' and 'Make Preferred' sub-
menu.

## Register Now

Once selected, your phone will try to register with the selected network. If the registration fails, your phone will try to register in the normal way.

## Make Preferred

Once selected, you will be asked where the selected network is to olocated in the preferred list.

## Network Search

These options determine how often your phone tries to register With a network and how the attempt is made.

This option determines how the phone tries to register with a This option
The option has two settings, Automatic Search or Manual Search.

## Automatic Search Mode

In the automatic mode, the phone will try to register with the first network in the sorted list. If this is successful, your phone w
If registration is uncesful with one
pegs will try the ert listed network, If your phone fails to phone wir try une next isted nework. If your phone fals
beginning of the list after a preset period. The preset period is
determined by the 'Frequency Of Search' option.

Manual Search Mode
In the manual mode, the phone will present you with the sorted list of networks. Your phone will try to register with the selected network, If this is suchesful the phe will display the name and then enter the standby mode.
If registration is unsuccessful, your phone will present the list again after a preset period. The preset period is determined by the 'Frequency Of Search' option.
Frequency Of Search
This option is used to determine how long your phone waits
before attempting to re-egister after a registration attempt has failed.
The option has the following settings: Slou Search, Medium Search, Fest Serch or Continuous Search.
■ Fast and Continuous Search may use up a significant amount of battery power.

## OX Preferred Networks

## Add Network To List

This option enables you to add networks to your preferred list.
When selected, the 'Choose From Available' option will scan to
see which networks are operating in your current location. When
you see a network you wish to store in your preferred list, press
-. You wir be asked where the selected network is to be
The 'Choose From Known' option will, when selected, present you with a preset list of networks. When you see a network you wish to store in your preferred list, press . You will be asked where the selected network is to be located in the preferred list. Select the 'Add New Network Code' option to enter network codes directly. Once entered, you will be asked where the network is to be located in the preferred list.

## Show List Of Networks

This option is used to display the networks you have stored in your preferred list. In addition, pressing will select the currently displayed entry and enter a move/delete sub-menu. When 'Move to New Location' is selected you will be asked to enter a new location for the selected network
When selected, 'Delete Selection' will remove the selected
network from the preferred list.

## Find New Network

When selected, the phone will try to register with a network in the normal manner, with one exception. When the registration attempt is made, your current network will be excluded from the list of those available. If the attempt fails, your phone will then try to re-register with the previous network.

## Call Meters Menu

English
60
Using the Options Menu

## Call Metering

Your phone has an int to provide you with individual and total call times or costs.

* Call cost information is only available if you receive the Advice of Charge service. If you do not receive this service, then only time meters are available.
The meter can be displayed during a phone call and audible tones can be generated to indicate the passage of call time. Your phone can handle values up to 21 digits long, although
during calls it can only display the last 12 digits. If the value exceeds 21 digits, then Too Lerge is displayed.
In addition, you can set a maximum charge limit so that your In addition, you can set a maximum charge limit so that your cost, and then not allow the limit to be exceeded.

## Show Call Charges

This feature allows you to display the cost of your calls or the amount of credit remaining. The figures are in phone units or currency depending on the setting of the Set. Charge Tyme option
Show Call Charges is only available if you receive the Advice of Charge service.

## Show Last Call

Displays the cost of your last chargeable call.
stac85en.bk : opt_menu.fm5 Page 61 Wednesday, January 28, 1998 9:06 AM

## Total For All Calls

Displays the cost of all your chargeable calls since the charge meters were reset to zero using the 'Reset Call Charges' option.

## Credit Remaining

Displays the difference between your total call costs and the lim
specified by the 'Set Total Charge Limit' option. If there is no
limit, Ho Chere Limit. Set will be displayed.

## Show Call Timers

This feature allows you to display
to reset your time meters to zero.
If you receive the Advice of Charge service then all calls are timed. If you do not receive the Advice of Charge service then depending on the model, either all calls or only outgoing calls are timed.
Show Last Call
Displays the duration of your last call.

## otal For All Calls

Displays the duration of all your calls since the time meter was reset to zero using the 'Reset All Timers' option.

## Reset All Timers

mero. The Lifetime Meter is not resettable.

## OK Set Audible Call Timers

Your phone provides two programmable audible call timers:

- The 'Single Alert Timer' will sound a beep just once during a call, after a preset time has elapsed.
The 'Repetitive Timer' will sound regular beeps during a call at preset intervals.
In both cases, the timers will sound their beeps ten seconds before the end of the programmed time

## Set In-Call Display

This feature allows you to specify whether the time or charge meters are displayed during a call. If you do not have the Advice of Charge service, then only the time meter is available.
L If a total charge limit has been set, then the in-call display always shows your remaining credit.

## Show Time Per Call

This option is used to display the time meter during calls. If you receive the Advice of Charge service, only the chargeable calls will be displayed.

## Show Charge Per Call, Show Total Call Charges

These menu items are only available if you receive the Advice of Charge service.
These options are used to display the call charges meter during and after chargeable calls. The meter shows phone units o currency depending on the setting of the 'Set Charge Type option.

## No In-Call Display

This option switches off in-call display of the charge/time meter.

## Call Charge Settings

This feature allows you to customise your Advice of Charge
settings. You will be prompted to enter your PIN2 security code
before you can access the options.
Ls This menu item is only available if you receive the Advice of Charge service.

## Reset Call Charges <br> This option resets your charge meters to zero.

Set Total Charge Limit
This option sets the maximum limit for call charges; once this limit has been reached, the network will refuse any further chargeable calls
If you switch the charge limit On, you will be prompted to enter new limit. Enter the amount as either units or currency depending on the setting of the Set Cherge Ture option Units must be entered as whole numbers.
When the charge limit is On, you will not be able to make fax or data calls.
Once a limit is set, the in-call display will show the remaining
credit. When you reach your last two minutes, the warning message Arprosching Charge Limit. will be displayed and a waming alert will sound. The sound will be repeated when one minute remains. When the limit is reached the message Chre Limit Reeched will be displayed and you will not be able to make any more chargeable calls.

Once the limit is reached the Total Charge Limit will need to be reset or switched off before any chargeable calls can be made. Select Off to switch off the charge limit.

## Set Charge Type

This option defines whether charge information is displayed as ther phone units or currency.
Units
Sets the charge type to phone units.
Currency
Sets the charge type to currency. You will be prompted to enter the Currencs Heme. Enter a 3-character notation, for example the Currency wame. Enter a 3-character notation, for example then be prompted for the Charle Fer Unit. Enter the amount and press
Lifetime Timer
This option is used to display the total time of all calls made on your phone.
This meter can not be reset, the 'Reset All Timers', 'Master Rese or 'Master Clear' options have no effect.

## Accessories

The following accessories have been designed to work with your phone. Additional accessories may be available and are packaged separately. Please refer to your local service provider or retail
outlet for more information.

## Desktop Charger (SPN4435)

The Desktop Charger allows you to charge a phone with a battery attached and a spare battery at the same time. The charging status for each battery is indicated by LEDs at the front of the charger.
4. The Desktop Charger must be used with the power adapter (SPN4278).

## Power Adapter (SPN4278)

The power adapter (charger) connects to the Desktop Charger or directly to the phone. When connected directly to the phone, it

## Cigarette Lighter Adapter (SYN4241)

The Cigarette Lighter Adapter connects to your phone and allows you to charge your phone's battery while driving. When the phone is in use, the adapter overrides the battery therefore preserving battery life. The adapter also provides dead battery operation.
The Cigarette Lighter Adapter is also available with a connection to an external antenna (SLN9934)

## Handsfree Car Kit (S5338)

The Handsfree Car Kit allows you to safely operate your phone while driving. The car kit provides a responsive directional
microphone and direct antenna connection. While connected to the phone, the car kit also charges the battery.

## UK Adapter Plug (SYN4656)

The UK Adapter Plug connects the Power Adapter to a UK-style The UK Adapter Plug

## European Adapter Plug (SYN4655)

The European Adapter Plug connects the Power Adapter to a .

## US Adapter Plug (SYN4657)

The US Adapter Plug connects the power adapter to a USA-style mains power outlet.

## Aust/NZ Adapter Plug (SYN4694

The Australia/New Zealand Adapter Plug connects the power New Zealand mains power outlet.

## PC Card (S5702)

The PC Card allows you to send and receive data and fax calls using your phone and a computer with a PCMCIA Type II slot. Transmission speed is up to 9600 Baud.
$\qquad$ -

## Leather PursePak - Black (SYN4900)

The Leather PursePak is a combination wallet and holder for your
phone. It includes space for money and credit cards.
Leather Pouch - Black (SYN4898)
The Leather Pouch holds the phone while being worn on your
belt, similar to your holster.
Slimline Holster (SYN4653)
For use without an auxiliary battery
Holster (SYN5378) For use with an auxiliary batter
