PHILIPS

Memory jogger card

To make a call: enter the number on the keypad, then press ☎ or press the Pilot Key and select the **Call** option.

To answer a call: press ☎ or press the Pilot Key and select the **Accept call** option.

To end a call: press ☏ or press the Pilot Key and select the **End call** option.

To use the Names list: press the Pilot Key from the idle screen and select the **NAMES** icon.
You can scroll through the list of recorded names. To dial, select a name and press ☎.
In idle screen, move the Pilot Key down once to reach the Names list.

Memory jogger card

To enter a name: select **<NEW>** from the Names list.

To access the carousel: simply press the Pilot Key. To select a function, move the Pilot Key upwards or downwards. Then confirm by pressing it. This gives access to the sub menu of the selected function. Continue in the same way (select by moving the Pilot Key, confirm by pressing it) until you reach the function you desire.

To return to the previous menu: press and hold the Pilot Key. You can also return to the previous display by pressing the Ⓒ key.

To return to the idle screen: press and hold Ⓒ.

Your very first call

Turn the phone face down

---

1 Insert the micro-SIM card.

Remove the micro-SIM card from the Sim card. Push the metal retaining clip to the right and lift the cardholder. Slide in the SIM card between the retaining clip and the plastic tongue with the cut corner of the card as shown on the drawing. Close the cardholder and push the retaining clip to the left.

---

2 Insert the battery

For optimum performance follow the instructions on page 12. Place the battery on the back of the phone (battery connectors downward, the top near the arrow inside the case). Then push the battery into place in the direction of the antenna.

NOTE:

A new battery is not completely charged.

Turn the phone face up

3 To switch on the phone.
Open the flip.
Press and hold the 🔴 key .

4 Enter your PIN code if asked (see page 11).
Then confirm by pressing the Pilot Key (key ➔▯).

5 Wait for the 2 beeps.
The connection is established. The green LED flashes and the screen looks like this:

```
┌─────────────────┐
│ Network name    │
│     \ | /        │
│    — ⊙ —         │
│     / | \        │
│ 01 Jan 1999     │
│ ▥▥          ¥☰  │
└─────────────────┘
```

To set the time and date, see page 39.

6 Enter the phone number.
If you make a mistake press ⓒ .

```
┌─────────────────┐
│ DIALLING        │
│ 0123456789      │
│                 │
│                 │
│ ▥▥          ¥☰  │
└─────────────────┘
```

7 Press 📞.
Once connected, your phone emits two beeps. For best reception pull the antenna out.
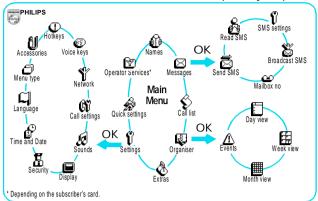

8 After the call press 🔴.

☎ *NOTES:*
1. You can hold a conversation even with the flip closed.
2. If the flip is in the closed position during a call, you can open it without affecting the call in progress.

⚙ *Using the carousel*

The carousel is a circular loop of icons displayed on the screen. These icons provide access to the different menus and sub menus used to operate your phone.

You can use the Pilot Key in 3 ways:

- by moving it upwards ↑⦅
- by moving it downwards ↓⦅
- by pressing it in ➜⦅

When you switch on your phone, the idle screen appears. To access the main menu, press the Pilot Key ➜⦅.

When you move the Pilot Key the carousel moves across the screen:

- upwards ↑⦅ the icons scroll clockwise.
- downwards ↓⦅ the icons scroll anti clockwise.

The Pilot Key provides access to all the menus used to operate your phone. To select a function, place the icon above the cursor and press the Pilot Key ➜⦅.
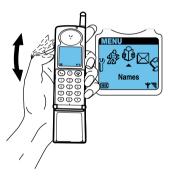

With the Pilot Key you can select or adjust all the functions of your phone (see Menu Memory Jogger cards and see the manual for details of menus).

Example

To adjust the contrast

After switching the phone on, press the Pilot Key ➜⦅ to access the main Menu:

Move the Pilot Key ↑〈 or ↓〈 and position the icon 📍Settings above the cursor.

Then confirm by pressing the Pilot Key ➜〈.

This gives you access to the *Settings* sub menu:

Move the Pilot Key (↑〈 or ↓〈) and position the 🖳Display icon above the cursor. Then confirm by pressing the Pilot Key ➜〈.

You enter the *Display* menu.

Move the Pilot Key (↑〈 or ↓〈) and position the 🌓Contrast icon above the cursor. Then confirm by pressing the Pilot Key ➜〈.

You enter the *Contrast* menu:

The active parameter appears underlined on the screen. In the above example it is *Level 3*.
Using the Pilot Key, adjust the contrast ↑〈 or ↓〈 and confirm.

> • **To return to the previous menu, press Ⓒ or press and hold the Pilot Key.**
> • **To return to the idle screen, press and hold Ⓒ.**

Activate/deactivate

Using the Pilot Key, you can activate or de-activate some functions.

Move the Pilot Key ↑〈 or ↓〈 to select *On* or *Off*, then confirm.

Using the Names and other lists

You can also use your Names list using the Pilot Key.

In idle mode move the Pilot Key downwards ↓〈 to access the Name list. By moving the Pilot Key down, you move down into the Names list. Turning it upwards moves up the Names list. Confirm your selection by pressing on the Pilot Key.

Glossary

|	
DTMF	Dual Tone Multi Frequency. The tones are transmitted by the phone to the network. They are used to interrogate answering machines, transmit codes, ...
EFR	Enhanced Full Rate. Standard for high quality sound GSM900. Your phone will switch EFR on automatically if it is supported by the GSM network you currently use.
FDN	Fixed Dialling Numbers. See also Public Names.
GSM network	Global System for Mobile communications. The type of phone network used by your phone.
Home network	The network on which your SIM card is registered.
Local network	The network where you are making a call. This may be your home network or another GSM network.
Multi-call	Two calls are in progress, one active and one on hold.
PIN code	Personal Identification Number. The secret code of the SIM card.
PIN2 code	Secret code that allows you to access certain SIM card dependent features.
Public Names	Function that allows you to restrict dialling to selected numbers.
PUK code	Secret code used to unblock your SIM card if you, or someone else, enters the wrong PIN code three times.
PUK2 code	Secret code used to unblock your SIM card if you, or someone else, enters the wrong PIN2 code three times.
Roaming	Using your phone in a network other than your home network.
SIM card	Subscriber Identification Module. The card which allows you to make phone calls with your GSM phone.
SMS	Short Message Service. This service provided by the operator allows you to send and receive short written messages.

Your phone

Description of the phone

3 2 1

4
5

6
8

9

10

11

1 Antenna
Pull out completely when making a call.

2 LED
- *Green flashing slowly* - means the phone is registered with a network.
- *Green flashing quickly* - means a call has been received but not yet answered.
- *Red flashing* - means the battery is low.

3 Earpiece

4 Pilot Key
It allows fast and easy access to the different menus and confirms your choice ➔ [.
- During a call, it controls the volume.
- In the Names list, menus or lists it scrolls up or down.
- When entering a name or number, it is used to move the cursor left or right.
- To return to the previous menu by pressing and holding it. To validate by pressing and holding it in an editor screen.

5 Graphic display

6 Green "Pick up" key ☺ symbol
Press to accept a call or dial a number.

7 Red "Hang up" ☎ and "On / Off" key symbol
Press to switch your phone on, press and hold to turn your phone off.
Press to end a call.

8 Cancel key ©
Navigation mode:
- Press this key to return to the previous menu.
- Press and hold it to return to the idle screen.
Edition mode:
- Press this key to delete a character.
- Press and hold it to delete all the characters.

9 Alphanumeric keypad
Standard phone keypad. It can also be used for entering alphabetic characters and activating hotkeys.

10 Microphone
It allows you to talk even with the flip closed.

11 Battery and micro SIM card
From the rear of the phone.
- Slide the SIM card in place.
- Fit the battery.

The flip:

The flip protects the keypad of your phone. It can be used with all the accessories (Traveler's Charger, Hands Free Kits, etc.).
To detach easily, push the flip downwards.

To reinstall the flip, first fit one side in the hinge on the phone, then the other.

INCORRECT   CORRECT

⚙️ *Screen*

Carousel:

A loop of icons on your display which provides access to the menu of your choice.

Date and time

Displayed in idle screen. To set the date and time, see "Settings" page 34.

Indicators

🔔 **Alarm clock**
Indicates that the alarm is activated.

✖️ **Silent**
Indicates that the ringer is turned off. The phone will not ring. It can still receive calls.

🔒 **Keypad Lock**
Protects the keys from being pressed accidentally.

🔁 **Call forward unconditionnal**
Indicates that the `Call forward` unconditionnal to a number is set.

Symbols

📶 **Battery charge**
If the first block is dark, the battery holds a 25% charge. Each bar represents approximatively 25% of the maximum charge.

✉️ **SMS message**
- *Symbol only* -You have received a new message.
- *Flashing symbol* - The message memory is full and cannot hold more messages. Delete one or more message to liberate memory.

📞 **Voice mail**
Indicates that you have received at least one new voice mail (Network dependent).

△ **Roaming**
This indicates that you are using a network other than your subscribed one.

Y **Network**
The phone is connected to a network. If the icon flashes the phone is trying to connect.

📶 **Reception quality**
4 reception bars indicate optimum quality.

🔩 *The micro-SIM card*

To use your phone, you must insert a valid SIM card that is supplied by your GSM service provider.

Your phone requires a micro-SIM card.

The SIM card contains your subscription number and your GSM phone number. It also contains a memory in which you can store phone numbers and messages. If you use your SIM card on another phone, your phone number and your Names list remain the same.

✆ NOTE:

Your phone accepts plug-in micro SIM card only.

Inserting your subscriber card (micro SIM card)

(See page 3).

Your PIN code and PUK code

When you switch on the phone, it asks you for the PIN code. The PIN code is the 4 to 8-digit secret code of the SIM card.

```
PINCODE
```

If you enter a wrong PIN code, you can try again. If you enter a wrong PIN code 3 times, your SIM card is blocked.

```
PINCODE          PINCODE          PINCODE
Try again        Last try         Blocked
```

You must then enter your PUK code to unblock the phone. This code will be given to you by your service provider. If you enter an incorrect PUK code ten times in a row the card will completely be blocked and be unusable. If this happens contact your service provider.

Your PIN2 code and PUK2 code

Depending on your SIM card, you may have some features on your phone that require you to enter a PIN2 code. This is a secret 4 to 8-digit code given to you by your service provider.

If you enter a wrong PIN2 code, you can try again. If you enter a wrong PIN2 code 3 times, your SIM card is blocked and you must enter the PIN2 unblocking code (PUK2) given to you by your service provider. If you enter an incorrect PUK2 code ten times in a row the card will be completely blocked and be unusable. If this happens contact your service provider.

⚙ *The battery*

Your phone is powered by a rechargeable battery. A new battery is not fully charged. Charge it by following the procedure on page 13.

A battery is only fully charged after having been charged and then totally discharged two or three times.

The ▥ icon shows the level of charge in the battery. Each bar represents approximately 25% of the maximum charge.

If the phone emits a warning signal (see page 36), the red LED flashes and the display shows `Battery low`, you should re-charge the battery.

The battery, attached to the phone or not, should not be exposed to temperatures exceeding 60°C (e.g. behind glass in direct sunlight).

We advise you to keep the battery attached to the phone, even when discharged. The backup battery for the clock (inside the phone) will last longer.

We do not recommend to remove the battery when the phone is switched on: you may lose all your personal settings.
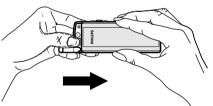

☻ *NOTE:*

Please refer to the information on battery safety, page 51.

Clipping on the battery

(See page 3).

Removing the battery

- **Press the locking button located alongside the antenna while pushing the battery in the direction of the arrow as shown on the drawing.**

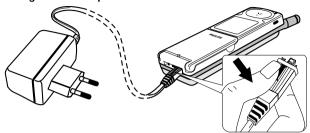

- **Remove the battery.**

⚙ *Charging the battery*

A charger is supplied with the phone, in the box.

- **Clip the battery on the phone.**
- **Plug the charger into the phone connector.**

- **Plug the transformer unit into a mains AC power socket.**

The 🔋 symbol indicates the state of charge:

- During charging the 4 charge indicators change. If the first bar is dark, the battery already has a 25% charge.
- The bars darken one after another during charging.
- When all 4 bars are dark the battery is fully charged. A minimum of 2 hours charging is required to obtain a 90% charge with a Vibra battery (capacity: 1200 mAh) and 1.5 hours with the slim battery (capacity: 800 mAh). For the maximum charge continue charging.
- When the battery is charged, press the release button to the topside of the connector to remove it. In order to save battery capacity you shouldn't wait for an empty battery capacity to charge it again.

➊ *NOTES:*

1. You can turn your phone on and use it while it is charging.
2. The only way to turn the battery charger off is to unplug it from the mains outlet; for this reason use a mains outlet with easy access.
3. You can connect the charger to an IT supply (Belgium only).
4. If the battery is completely flat, the battery icon will only reappear after 2 or 3 minutes of charging.
5. If you attempt to charge your phone with an invalid charger, your phone will refuse the charge. This will be signified by:
   - the flashing of the backlight every second
   - the flashing of the battery fixed icon
   - a continuous alert beep
   - a message `Acessory not compatible. Please unplug` *displayed on the screen.*
   This measure is designed to protect your phone. For best results, always use a Philips Authentic Accessory.

⚙️ *Making an emergency call*

112: European emergency call

Key in the emergency number for your present location (e.g. 112 or other official emergency number). Emergency numbers vary depending on the location.

- **Switch on the phone**.
  The display shows the welcome screen.
  Even if you are asked for your PIN code, your phone will function without it.
- **Enter the emergency number (112) or press Pick-up key 📞 if PIN code asked."**
- **Press 📞 .**
  The phone dials the number.
- **After the call, press 🔴.**

🔧 *NOTE:*

1. *Some networks may require a SIM card for emergency calls. Check with your service provider.*
2. *You can also enter the emergency number using the keypad, even when the keypad is locked.*

🔩 *Switching on*

- **Press the 🔘 key.**
- **Enter your PIN code if asked and press ➔ ⏻.**

❹ *NOTE:*

The PIN code requirement is a security feature that you can switch on and off using the "PIN protection*" menu (see page 38).

🔩 *Idle screen*

After switching on (and entering the PIN code), your phone displays the idle screen which means that the phone is ready to use. At the same time:

- the Ψ icon is displayed and the LED to the left of the antenna flashes, this indicates that the phone is connected to the network. The network name appears on the screen.
- the ≡ symbol is displayed, indicating the quality of reception (when all 4 bars appear, the audio quality is at its best).

If the Ψ symbol and the network name are not displayed, the network is not currently available. You may be in a bad reception area (perhaps in a tunnel or between tall buildings). If possible, move to a different location.

If you navigate into the menus or the Names list, the phone automatically returns to idle screen if a key is not pressed for 2 minutes. During this period of time you can still receive a call.

How to enter a text or a number

Characters and numbers are located on each key as follow :

Key Label	Upper case alphanumeric	Lower case alphanumeric
1	space 1 @ # = < > ( ) **& £ $ ¥**	space 1 @ # = < > ( ) **& £ $ ¥**
2ABC	A B C 2 A Â Å Æ Ç	a b c 2 à ä å æ ç
3DEF	D E F 3 É E Δ Φ	d e f 3 é è Δ Φ
4GHI	G H I 4 Γ I	g h i 4 Γ ì
5JKL	J K L 5 Λ	j k l 5 Λ
6MNO	M N O 6 Ñ Ò Ö Ø	m n o 6 ñ ò ö ø
7PQRS	P Q R S 7 β Π Θ Σ	p q r s 7 β Π Θ Σ
8TUV	T U V 8 Ü Ù	t u v 8 ü ù
9WXYZ	W X Y Z 9 Ω Ξ Ψ	w x y z 9 Ω Ξ Ψ
0.	. 0 ' ' ' ? ! , : ; ¡ ¿	. 0 ' ' ' ? ! , : ; ¡ ¿
*+	* + - / %	* + - / %
#=	lower case upper case	lower case upper case

For example, to enter "Love", you have to press ⑤ thrice, press ⑥ thrice, press ⑧ thrice and press ③ twice. The word "Love" will appear on the screen.

✆ *NOTES:*

1. *A number can contain a maximum of 40 digits, depending on your SIM card.*
2. *It is a good idea to enter all numbers, even local ones, with their international prefix, country code and area code. Thus you can dial all numbers from any location.*
3. *The '+' character can only be inserted at the beginning of a number.*
4. *To correct mistakes, press ⓒ and release to delete one digit.*

Events in idle screen

Some events may modify the idle screen (missed call, new message, reminder from the organiser, etc.). In this context, press the Pilot Key ➡〔 to access a contextual menu or press on the ⓒ key to go back to idle.

```
MISSED CALL

1 missed
```

Making a call

In idle screen :

- **Enter the phone number using the keypad.**
  To correct an error, press ⓒ . To move through numbers move the Pilot Key upwards or downwards.
  For an international call, you can enter the "+" key instead of the usual international prefix. To do this press and hold ⊛ .
- **Press ☏ .**
  The phone dials the number.
- **After the call, press ⊚ to hang up.**

✆ *NOTE:*

1. *You can also make a call from the* Names *(see page 6).*
2. *If a number has been programmed on a direct access key, you can call this number by pressing and holding the key (see Flash dial page 18).*
3. *If the called number is in the Names list, the corresponding name will be displayed instead of the number.*

Answering and ending a call

When receiving a call, the phone rings, the)) 🖪 animation and Incoming call appears on the display, and the green LED flashes. Depending on your subscription, the caller's number may be displayed. If this number is in the Names list, the corresponding name shall be displayed instead of the number.

- **To answer a call you can either:**
  - **press** $\smile$.
  - **press the Pilot Key** ➔〔**, a carousel with the following options appears:**
    - **Silent ringer** Silent

      The ringer volume of this incoming call is set to silent and the phone goes back to the incoming call screen.
    - **Accept call** Accept call
    - **Reject call** Reject call
- **To hang up a call you can either:**
  - **press** $\textcircled{\smallfrown}$.
  - **press the Pilot Key** ➔〔**, a carousel appears:**
    - **select End Call and confirm.**
- **If you want to reject the call, press** $\textcircled{\smallfrown}$.

  The phone returns to idle screen and the caller hears the busy tone.
  If you have activated "Call forward when busy" (see page 43), the call is diverted to the selected number (your voice mailbox, for example)

✆ *NOTES:*
1. The phone will not ring if the ringer is deactivated (see page 21).
2. If you have a Vibra Battery you may activate the vibrator function to be discretely warned of incoming calls (see accessories page 56).
3. If you have selected Any Key Answer (see page 44), you can accept a call by pressing any key (except $\textcircled{\smallfrown}$) or by pressing the Pilot Key.

Redial and reply

The phone stores the last 30 numbers (called or received). You can redial or reply to any of these numbers and dial it directly. The most recent is displayed first.

In idle screen:

- **Press** ➔〔 **to access the main Menu.**
  Select **Call list**. This displays a chronological list of the last calls either received or dialled.
  If a number is in your Names list, the corresponding name is displayed.
- **Move the Pilot Key up or down to select the number you want to redial or reply.**
- **Press** $\smile$.
  The phone dials the number. Wait for your correspondent to answer.
- **After the call, press** $\textcircled{\smallfrown}$ **to hang up.**

✆ *NOTES:*
1) You can directly access to the Call list by moving up the Pilot Key.
2) You can directly access to the last dialling number by pressing the pick up key $\smile$.

⚙️ *Voice dial*

You can automatically dial a number by saying your correspondent's name.

In idle screen:

- **To program a voice tag :**
  In the Names menu, select the Name you want to add a Voice dial to. Press the Pilot Key ➔▯ twice then select *Voice dial* then *Add Voice tag?*.
  Follow the instructions displayed on the screen which invite you to say, then to repeat the voice tag.
- **To dial a number associated with a voice tag:**
  Press and hold the Pilot key, then say the voice tag of the number to dial.
  If the phone recognises the voice tag, it repeats it then immediately dials the number associated with it.

🔊 *NOTES:*
1. *The duration of a voice tag is 2 seconds.*
2. *Up to 15 voice tags can be defined.*

⚙️ *Flash dial*

You can associate any of the keys ② to ⑨ with a Names list entry to give you direct access, through a single long key press, to a frequently used phone number (see page 24). Key ⓪ and ① are defined and cannot be changed. (See page 41).

In idle screen:

- **Press and hold a key between ② and ⑨ to dial the associated entry.**
  The connection is established.
- **After the call press ☎ to hang up.**

You can use your 📞 as a redialling key, indeed, a first press on this key displays the last number dialled (or name if the number is in the Names list), a second press on the same key dials the number. The hotkey option is still available to redial the last number (see page 41).

⚙️ *During a call…*

You can:

- Adjust the earpiece volume (see page 19)
- Mute or unmute the microphone (see page 19)
- Write a number in the notepad (see page 19)
- Consult the Names list (see page 20)
- Add a name to the Names list (see page 24)
- Write and send a message via the Names list or the Notepad (see page 24)
- Check a voice mailbox or access a voice server via the Notepad (see page 28)
- Make a second call (see page 47)

- Consult your Organiser (see page 29)
- Consult your Call list (see page 29)
- Transmit DTMF tones to answering machines and other devices(see page 46).

Adjusting the earpiece volume

During a call:

- **Move the Pilot Key up ↑◖ to increase the volume or down ↓◖ to decrease it.**

Mute the microphone

You can mute the microphone so that your correspondent cannot hear you.

During a call:

- **Press ➡◖ and select** *Mute*.
  Confirm by ➡◖.
  The microphone is muted.

Unmute the microphone

If the microphone is muted.

- **Press ➡◖ and move the Pilot Key until** *Unmute* **is displayed.**
  Confirm ➡◖.
  The microphone is unmuted.

Writing in the notepad

The notepad is a temporary memory in which you can note down a number during a call.

During a call:

- **Press ➡◖**
- **Move the Pilot Key up ↑◖ or down ↓◖ to select** *notepad*,
  then press ➡◖.
- **Enter the number that you want to note.**
  After a while, without any key pressed, your entry is stored in the notepad memory and the phone returns to the call options screen. When the call ends, the number re-appears; you can complete it, dial it, or store it in the Names list.
  On the contrary if you press the Pilot Key ➡◖ just after having entered the number you will be able to :
    . store this number in memory
    . phone this number
    . send a SMS to this number

✆ *NOTE:*

You can also just enter the number during the call and it will re-appear when the call ends.

Consulting the Names list

During a call:

- **Press ➜〔.**
- **Move the Pilot Key to select Names, then confirm by pressing the Pilot Key.**
- **In the NAMES menu, scroll through the entries by moving the Pilot Key.**
- **Press ⓒ to return to the In-call screen.**

Locking the keypad

You can lock the keypad to protect the keys from being pressed accidentally (for example, when the phone is in your pocket).

In idle screen:

- **In the Settings menu, select Security, Keypad lock. Move the Pilot Key to select immediate or delayed lock. When the keypad is locked 🔒 appears on the screen.**
- **In idle mode, with a long press on the ⓒ key, you can also activate the keypad lock.**

NOTES:
1. *The emergency number is available even when the keypad is locked (dial 112) and you can still receive calls.*
2. *To switch the phone off, you must first unlock the keypad.*
3. *Immediate keypad lock can be assigned to a corresponding Hotkey (see page 41).*

Unlocking the keypad

With the keypad locked:

- **Move the Pilot Key upwards then downwards.**
  The keypad is unlocked.
- **With a long press on the ⓒ key, you can also deactivate the keypad lock.**

NOTES:
1. *It is possible to accept or reject a call even when the keypad is locked. The keypad is unlocked automatically when the phone receives a call, and then re-locks again once the call is finished.*
2. *If you choose to unlock the keypad with a delay, it will be permanently unlocked (after that delay). If you choose the 'unlock now' setting, it will be temporily unlocked until you finish the action.*

⚙ *Activate/deactivate the silent mode*

If you do not want your phone to ring when you receive a call, activate the silent ringer.

If you receive a call while the silent mode is activated, the ⑊ 🖳 symbol flashes, the green LED flashes quickly, and the display shows *Incoming call*, but the phone does not ring.

In idle screen:

> • **Press ➔〖, select the** *Settings* **menu,** *Sounds* , *Ringer volume* **and move the Pilot Key to silent.**
> **Press ➔〖 to confirm.**
> The ringer is deactivated. To reactivate the ringer, repeat the above sequence and select the required volume.

🔆 *NOTE*

Silent mode can be assigned to a hotkey (see page 41)

⚙ *Activate/deactivate the vibrator*

If you have the Vibra battery and if you have set the function, your phone vibrates when you receive an incoming call.

In idle screen:

> • **Press ➔〖, select** *Settings*. **Select** *Sounds* **(confirm) then select** *Vibrator*.
> Move the Pilot Key to select *On* or *Off* and press to confirm.

Using the Vibra battery doesn't mute the ringer. If you want to mute it and keep only the vibrator function active, set the quick setting *Silence*.

🔆 *NOTES:*

1. *The Vibrator option is only available if a vibrating battery is installed (see batteries page 56).*
2. *The Vibra Setting is independent from the ringer. You can activate both at the same time.*

⚙ *Reading your GSM phone number*

In idle screen:

> • **Press ➔〖.**
> • **In the** *Names* **menu, move the Pilot Key until you reach** *Own Number*.
> Your phone number is displayed if it is present on your SIM card. If not, then enter the number, then press ➔〖 to save it.

🔆 *NOTE:*

If your own number has been stored in the Names list, you can read it during a call. See "Consulting the Names list". page 20.

Easy to find and simple to use in either Advanced menu or Simple menu mode via the Pilot Key, the menus contain all your GSM phone functions. All the menus have icons with scrollable lists and are used in the same way. The messages displayed on the screen explain what you have to do.

When turning on your phone the Simple navigation mode is proposed. To access the Advanced mode offering the maximum number of options, select and confirm Menu type in the Settings from the main menu.

Overview of menus

NOTES:

* In advanced mode only.
*** When an accessory is plugged only.*

Names

The Names menu allows you to consult the list of your correspondents, add new names, write and send messages. The names are listed in alphabetical order. You can scroll through the list using the Pilot Key or by entering the first letter of the name. In the list you can choose from the following:

NOTE:
In idle mode, you can directly access the names list by moving the Pilot Key downwards ↓ .

<New>

This menu allows you to enter the name and phone number of a new correspondent. In Advanced mode, you can select the type of number allocated to the name: phone, fax or data.

NUMBER TYPE

Phone

Select a name

By selecting a name, you display the associated number. A second press on the Pilot Key → allows you to :

ALAN
0541956790

- call
- send message
- associate a voice dial
- flash dial
- delete
- modify

You can directly access the first letter of your correspondent's name in the Names List by pressing the right alphanumeric key. For example, if you want to access the letter 'U', just press the key number '8' twice.

Send SMS

See page 25 and 26 to: Send now, Add icon and Save.

Voice Dial

The Voice Dial allows you to automatically dial the number of your correspondent by saying the associated tag (see page 18).

VOICE DIAL

Play voice

You can either associate a new voice tag to a number in the Names list or manage the existing voice tags through the following options: delete, play voice and change.

Flash dial

The Flash dial menu provides you with direct access to the phone numbers that you use most frequently. This is done by linking them to the keys from ② to ⑨.

Delete

The ⌦ Delete menu allows you to delete the number and selected name.

Change

The Change menu allows you to modify the selected name, number and determine whether it is a fax, phone or data transmission number.

Emergency

The selection displays the emergency call number. Press 📞 to dial.

Own number

Selecting Own No. 1, Own No. 2, Own No. 3 display your own phone numbers. If your SIM card does not contain your phone numbers, an editing screen allows you to store them.

⚙ *Messages*

The Messages menu allows you to manage the messages in your voice mailbox, messages to be sent, messages to be read, your message settings and broadcast messages.

Send SMS

The Send SMS allows you to:

- send it to a correspondent in your Names list,
- write a new message or select a standard one.

The Standard SMS messages are displayed one after another:

- Please call me back at for example allows you to compose automatically a message including your own number.

Once your text is written, you can link an emotion icon to it, send the message and save it.

Send now

The Send now option allows you to send the current message.

Add icon

The option allows you to send an emotion icon together with your message. To see the image, the receiver needs a GSM mobile phone which supports emotion icons (Philips Savvy for example). Otherwise the equivalent code will be displayed at the end of the receiver's message.

Image		Code sent
	Smile	:-)
	Wink	;-)
	Cool	B-)
	Tongue	:-P
	Sad	:-(
	Angry	:-/
	Meow!	:<*
	Woof!	:>#
	Teddy	8<)
	Magic	=:I
	Heart	(0)
	Broken heart	(X)
	Yo!	Yo!
	Well done!	==b
	Party	o<I
	Cake	iii
	Flower	@>-
	Drink	>-I
	Coffee	ID
	Cloudy	;;;
	Sunny	>o<
	Holidays	-Y-
	Ball	(I)
	BOOM!	>*<
	Deadly	%-I

Save

The option allows you to save the current message.

Read SMS

The menu allows you to consult the list of SMS you have saved, and received.

Using different carousels, you can also delete, reply, re-send or forward these messages."

Saved Messages

The messages you sent are labelled with ⊟ in normal mode

or with ▭ in auto save SMS mode (see page 28). Select the message you want and press the Pilot key ➔ ‌ to read it. When displayed, press the Pilot key ➔ ‌ to acess the following options:

Send SMS
Allows you to modify the content and the addressee of the message, add or change the icon, send it and save it (see also above to: Send now, Add icon and Save).

Delete
Allows you to delete the selected message.

Received Messages selection
The messages you received are labelled with ⊠ . Select the message you want and press the Pilot key ➔ ‌ to read it. When displayed, press the Pilot key ➔ ‌ to access the following options:

Reply
Allows you to reply to the sender. You can either write a new message or select a standard one. Once the message is defined, you can link it with an emotion icon, send it and save it.

Forward to
Allows you to forward the selected message. You can either choose the adressee in the Names list or enter his phone number manually.

Delete

Allows you to delete the selected message.

SMS settings

The menu allows you to customise your SMS via the following options:

SMS centre

The option allows you to select your default SMS centre. If not available on your SIM card, you can enter your SMS centre number.

Signature

The option allows you to send a signature together with your SMS. This signature consists of a series of characters showing your default account number and name. This forms a signature that is transmitted at the end of your message. The length of the message is consequently reduced. You can edit this signature, modify it and save it.

Validity period

The ![icon](Validity period) option allows you to select the length of time your message is to be stored in your SMS centre. This is useful when your correspondent is not connected to the network.

Reply path

You can activate or deactivate the ![icon](Reply path) option (in Advanced menu mode only). This option transmits your SMS message centre number with the message. Your correspondent can then reply using your own SMS centre and not his. This speeds up the rate of transmission.

Delivery report

You can activate or deactivate the ![icon](Delivery report) option which informs you via a written message that your SMS was received or not (Advanced menu mode only).

Auto save SMS

The ![icon](Auto save SMS) option activates or deactivates the automatic saving of messages sent.

Broadcast SMS

The ![icon](Broadcast SMS) menu allows you to activate or deactivate the reception of SMS broadcast by the network to all subscribers.

Cell Broadcast is a service which, when activated, causes the mobile to listen to messages which are regularly transmitted to all subscribers on the network.

The menu allows you to activate or deactivate the reception of cell broadcast messages.

The menu allows you to define the type of messages you want to receive.

To define a new type, select **<New>**, enter the code, and, if desired, associate a name.
If you select an existing type in the list, you can change or delete it.
It is possible to enter up to 15 different types in the list.

The ![icon](District Code) menu allows you to select a type from the Topics list, which you would like to be permanently displayed in the idle screen. As a result, for this special handling of the message, you must enter the type in both the ![icon](District Code) menu and the menu. The corresponding type will then be recognised in the Topics list with a ![icon].

Mailbox No

The ![icon](Mailbox no.) menu allows you to enter your voice mailbox number if not available on your SIM card.

⚙ *Call list*

The ✎ Call list menu provides you with the list of calls you have received and given, as well as attempts at auto redial and details of voice messages. The calls are displayed in chronological order with the most recent first. When the Call List is empty the screen displays **List empty**. Otherwise for any selected call you can, by pressing the Pilot Key ➡ {], consult the date, time, number, call status and whether it was sent or received.

A second press on the Pilot Key ➡ {] gives access to this following carousel which allows to send a SMS, delete the selected call, phone this number or store this number by entering the associated name (if not present in your phonebook).

CALL LIST

Call

Select a record in the Call list and press the 📞 to dial the corresponding number.

❸ NOTE:
You can directly access to the Call list by moving the Pilot Key upwards.

⚙ *Organiser*

ORGANISER

Events

The Organiser menu allows you to manage up to 40 events.

Those events appear in the lists in a chronological order, using start times and dates, with the most recent one on top.

When memory is full the message "Memory full" appears.
Before being able to add a new event you have to delete events in past day view, week view or month view

Events

The ⚠ Events menu is a list which enables you to consult, modify and add new events.

Add a New event

This provides access to four different types of events: Meeting, To Do, Quick Settings, Holidays. Select one to create a new event.

NEW

Meeting

Meeting

The Meeting menu allows you to enter a date, a start and end time, the main details, and an alert. The event may be repeated (in Advanced mode only).

To Do

The ⬚ ToDo menu allows you to enter a date, a time, general details, and an alert. The event may be repeated (in Advanced mode only).

Quick Settings

The ⬚ Quick Settings menu allows you to program the activation of a specific Quick Setting. Select a date and time, and the Quick Setting to be activated (see page 45). The event may be repeated (in Advanced mode only).

Holiday

The ⬚ Holiday menu allows you to enter events relating to your Holidays, with start and end dates. The event may be repeated (in Advanced mode only).

Select an event

By selecting an event, you can be reminded of the details of an event existing in the list. You may change its details, set a reminder, repeat it at a selected frequency. You can also delete it.

MEETING
Set reminder

Set reminder

The ⬚ Set reminder menu reminds you of events via alerts triggered at times you have chosen in the carousel (in Advanced mode). Only for Meeting and To Do events.

SET REMINDER
No reminder

Repeat events

The ⬚ Repeat events menu allows you to repeat events at a frequency you have chosen in the carousel.

REPEAT EVENT
No repeat

Change

The ⬚ Change menu allows you to modify dates, times and the type of event.
In advanced mode you can also modify the reminder and repeat option.

Delete

The ⬚ Delete menu allows you to delete the event.

Day view, Week view and Month view

In each organiser view ⬚ Day view , ⬚ Week view , ⬚ Month view moving the Pilot Key upwards or downwards allows you to display the next or the previous day, week and month.
Once you have selected the day, the week or the month, press the Pilot Key to display the list of corresponding events.

Extras

The Extras menu enables you to manage the Call counters, Euro converter, Voice memo, Alarm clock, Calculator and game.

Call counters

The Call counters menu allows you to handle the cost and duration of your calls.

Last call information

The Last call info menu allows you to display the duration and/or cost (depending on your subscription) of your last calls.

Info at call end

The Info at call end menu enables you to activate or deactivate the systematic display of the length and/or cost of each call (depending on your subscription).

Accumulated call timers

The Accum. call \ timers menu allows you to check the duration of both incoming and outgoing calls and to set the counters to zero.

Accumulated cost

The Accum. cost menu allows you to display the accumulated cost and to set the counter to zero. It may be protected by PIN or PIN2 codes (depending on your subscription).

Show

The Show menu shows you how much has been spent after having established the charge rate.

Charge rate

The Charge rate menu allows you to set or change the rate per unit. First enter the currency used (three characters maximum) then enter the cost per unit.

Cost limit

The Cost limit menu allows you to enter the cost limit used in the Show balance menu.

Cancel cost limit

The Cancel cost limit menu allows you to cancel the cost limit. It may be protected by PIN or PIN2 codes (depending on your subscription).
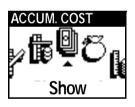

Show balance

The Show balance menu allows you to check the remaining credit (compared with your previously set limit).

Reset

The [⊞ Reset] menu allows you to reset the current accumulated cost to 0; requires your PIN2 code

–> Euros

The [⊞ -> Euros] menu enables you to convert a sum into Euros.

<– Euros

The [⊞ <- Euros] menu enables you to convert a sum from Euros.

❶ *NOTE:*

The currency used for the conversion is determined by the country where you have subscribed.

Voice memo

The [⊞ Voice memo] menu allows you to record a memo of 20 seconds maximum. You can stop the recording at any time by pressing the Pilot key ➔[. Once your memo is recorded, you can play it back or delete it.

VOICE MEMO

Play voice memo

Alarm clock

The [⊞ Alarm clock] menu allows you to activate, deactivate and set the alarm function of your phone.

REPEAT EVENT

Every day

[≤1 Once] : activates the alarm at a set hour on a set day.

[◖ Every day] : activates the alarm at a set hour every day of the week.

[⊞ On weekday] : activates the alarm at a set hour on weekdays only.

Calculator

The [⊞ Calculator] menu provides the following functions:

Addition	by pressing the ⊛ key
Substraction	by pressing the ⊛ key twice
Multiplication	by pressing the ⊛ key three times
Division	by pressing the ⊛ key four times
Equals	by pressing the ⊕ key

CALCULATOR
1.3568
+500
= 501.3568
/ 100

The figures are entered using the keypad. Calculator accuracy is to 2 decimal places and is rounded up to the higher decimal figure. Press Ⓒ to correct the numbers. Press and hold 0 to get the dot. Press and hold Ⓒ to return to the idle screen.
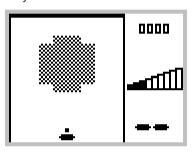

Brick Game

The   Brick Game   consists in breaking a complete set of bricks with a ball and a racket. When you have broken all of them, you play with a new set of bricks (new level).

Game principle :

- the ball is moving through the screen, rebounding on different elements. When it hits a brick, the brick disappears and your performance increases.
- the racket moves horizontally at the bottom of the screen. When the ball reaches the bottom of the screen, you must hit it.
- into the second level, some special bricks need to be hit twice to be broken (the black ones), and some other are indestructible (the empty ones).
- if the ball hits the floor, you lose a credit.
- when you have lost all your credits, the 3 best scores and the corresponding players' names are displayed on the screen. If your score is greater than the last one ranked, your are asked to enter your name.
- You score extra credit every three level.

Keys used :

④ and ⑥	to go left and right
✳ and #	to throw the ball left and right
⓪	to do a break

⚙ *Settings*

The 🔧
Settings menu allows you to customise your phone.

🎵
Sounds — To select the different ringer melodies and alert beeps.

🖥
Display — To set the display parameters: contrast, animation, backlighting and zoom

🔒
Security — To manage security: PIN codes, keypad lock, restrictions, etc.

🕐
Time and date — To set the time and date, change the clock display mode.

🏳
Language — To set the language used by your phone.

🗂
Menu type — To select the Navigation mode: Simple or Advanced.

📱
Accessories — To set the parameters when you use your phone with hands free car kit or with a headset.

①
Hotkeys — To program direct access to a function via a single key press.

🎙
Voice keys — To set a direct access to several functions by saying the associated Word.

📶
Network — To handle the connection between the phone and the network.

📞
Call settings — To set the call options (Call Forward, call Waiting, Caller Identifier, ...).

Sounds

The 🎵
Sounds menu allows you to select the different ringer melodies and alert.

Ringer volume

The 🔊
Ringer volume option allows you to set the volume of your ringer: it may be Increasing, High, Medium, Low or Silent. You can use a Hotkey to activate the silent mode (see page 21). By default the ringer volume is set to 'Medium'.

Ringer

The 🔔
Ringer option enables you to select the ringer type from among 19 melodies. Scroll through the list and wait fot two seconds to hear the highlighted melody played. Confirm your choice of melody by ➡ 🔲 This menu also enables you to create the 20th melody.

Creating a 20th melody: Own melody

Creating a 20th melody: Own melody

This option allows you to compose a melody with up to 66 notes. You select the required notes on the keys from ① to ⑧ and the rests with ⑨ and ⓪. The default note is B. With ⬆ or ⬇ you can change the notes up or down in semitones. You can change notes to flats by the ⊛ key or to sharps by the ⌗ key. Each time you press another key than a digital one, you will hear the note and the corresponding effect. Press other digital keys from ① to ⑧ to obtain new notes with the following values:

TYPES	LENGTH/SHARP	KEYS
Semi quaver	1/4	1
Quaver	1/2	2
Dotted quaver	3/4	3
Sharp	1	4
Dotted sharp	3/2	5
Minim	2	6
Dotted minim	3	7
Whole note	4	8
Quaver rest	½	9
Crotchet rest	1	0

Example

How to obtain such a melody

NOTES	LENGTHS		HEIGHTS		
	TYPE	KEY	VALUE	X ⬇	Y ⬆
1st note	Minim	6	E	4	
2nd note	Dotted minim	7	B	3	
3rd note	Sharp	4	B-flat		7 and *
4th note	Dotted quaver	3	B-sharp		6

Key tones

This Key tones menu allows you to activate or deactivate the key tones. If you press an unvalid key the phone emits an error beep.
Even if Key Tones are set Off, DTMF are "played" during calls.

Minute beep

The Minute beep menu allows you to activate or deactivate a beep every minute during a call. It is only available in Advanced menu mode (the beep cannot be heard by your correspondent). Each beep is emitted 15 s before the end of each minute of communication. This allows you to manage as efficiently as possible the duration of your calls.

Organiser alerts

The ⌨ Organiser alert menu allows you to activate or deactivate an alert when an event is due.

Battery low alert

The 🔋 Battery low alert menu allows you to activate or deactivate an alert which informs you that the battery is low and requires recharging.

New SMS tone

The 📧 New SMS tone menu allows you to activate or deactivate an alert tone each time you receive a SMS.

Vibrator

The 📳 Vibrator function allows you to activate or deactivate the vibrating alert when receiving a call*.

❸ NOTE

If you use a Vibra battery.

Display

The 🖥 Display menu allows you to set the zoom, the backlight, the contrast and screen animation (only in Advanced mode).

Zoom on/off

The 🔍 Zoom menu allows you to activate or deactivate the zoom function. It enlarges the size of text used in the menus.

Backlight

The 💡 Backlight menu allows you to select the backlight duration:

- no backlight
- 10 seconds backlight
- 30 seconds backlight
- 1 minute backlight

The backlight will be activated when receiving incoming calls, messages, etc.

Animation

The 🎞 Animation menu allows you to activate or deactivate the animation in different menus (only in Advanced menu). Deactivating this function increases the autonomy of your phone.

Contrast

The Contrast menu allows you to choose among 5 levels of contrast.

Security

The Security menu ensures the security of your phone by locking the keypad, limiting calls to public numbers, prohibiting specific incoming and outgoing calls, activating security via PIN codes and changing those PIN codes.

Keypad lock

The Keypad lock menu allows you to activate or deactivate the keypad lock. The keypad automatically unlocks when you receive a call. When your keypad is locked, you can unlock it by moving up and down the Pilot key ↑ and ↓ or via a long press on the © key.

🔔 *NOTE:*

You can still place an emergency call by dialling '112'.

Public names

The Public names menu allows you to lend your phone with your subscriber card. It allows you to restrict calls to numbers that you have previously defined in your Public Names list. This function may depend on your subscription (in Advanced mode only).

Call restriction

The Call restriction menu allows you to activate or deactivate the call restriction to the Public Names list. In both cases you must enter your PIN2 code.

Public names

The Public names menu allows you to consult your Public Names list. You can also enter a new name, modify or delete a name in the list via PIN2 code.

- **<New>**
  This menu allows you to enter the name and phone number of a new correspondent. In Advanced mode, you can select the type of number allocated to the name: **phone**, **fax** or **data**.
  Change

  The Change menu allows you to modify the selected name, number and determine whether it is a fax, phone or data transmission number.

Delete

The [trash icon] Delete menu allows you to delete the number and selected name.

Call barring

The [icon] Call barring menu allows you to limit the use of your phone to specific calls. This function is network dependent and requires a call barring password supplied by your service provider.

This carousel allows you to bar [icon] Outgoing and [icon] Incoming calls.

Outgoing

The [icon] Outgoing menu allows you to select between [icon] All calls , [icon] International calls and [icon] Inter. except/home (the latter allowing you to call your home country when you are abroad). You can also [icon] Deactivate the bans on outgoing calls.

The [icon] All calls , [icon] International and [icon] Inter. except/home menus enable you to bar [icon] All calls , [icon] Voice calls , [icon] Data calls or [icon] Fax calls .

Incoming

The [icon] Incoming menu allows you to select [icon] All calls or [icon] When Roaming . It also provides access to the [icon] Cancel menu that removes bans on incoming calls.

The [icon] When Roaming menu and the [icon] All calls menu, allow you to select [icon] All calls , [icon] Voice calls , [icon] Data calls and [icon] Fax calls .

Status

The [icon] Status menu allows you to know whether a type of call is barred or not.

Change codes

The [icon] Change codes menu allows you to change your PIN codes and call barring password.

PIN protection

The [icon] Pin Protection menu allows you to activate or deactivate the PIN protection when switching on your phone. This is carried out via the PIN code that puts your phone in service. If your PIN code is deactivated, you cannot change it.

Time and date

The Time and date menu allows you to set the time and date and choose the clock display format.

TIME AND DATE

Clock display

Clock display

The Clock display option allows you to select analogue or digital time formats.

CLOCK DISPLAY

Analogue

Analogue

The Analogue option allows you to display the time on the idle screen using a clock face. Depending on the activated services, the clock display may automatically switch to the digital format.

Digital

The Digital option allows you to display the time on the idle screen using a digital format.

Set date

The Set date option allows you to set the date by pressing the respective keys. You can also set the date by moving up ↑] or down ↓] the Pilot key.

SET DATE
30/03/99
Monday 30
March 1999

Set time

The Set time option allows you to set the time. You can also set the time by keying it in the keypad. Moving up ↑] or down ↓] the Pilot key increases or decreases the time minute by minute.

ENTER TIME

10:30

Language

The Language menu allows you to select a language for the texts displayed in the menus. A long press on ⓪ when in the idle screen, provides you with a shortcut to this menu.

Menu type

This menu allows you to choose between the following navigation modes:

Simple menu

The Simple menu mode provides you with a simplified access to the basic functions of your phone. You can make and receive calls, make emergency calls, consult the Names list, swap to Advanced mode etc.

Advanced menu

The 📟 Advanced menu mode provides you with access to all the features of your phone.

Accessories

The 📎 Accessories menu becomes available the first time an accessory is plugged in (car kit). It allows you to set the parameters linked to the accessories.

Car melodies

The 🚗 Car melodies option allows you to select the incoming call melody to be played by the car kit. 5 melodies are available : 4 melodies specific to the car kit plus the one you have previously chosen for your phone.

Speakers

The 🔊 Speakers option allows you to listen to your phone conversations, either through the car kit speaker or the radio speaker (if available).

Car kit command

The 🚗 Car kit\command allows you to activate the voice dial via a voice tag. The phone plugged on the car kit, use this menu to program the Voice keys by following the on-screen instructions. Once the Voice keys is defined, the car kit listens: as soon as you will pronounce the Voice keys the car kit will emit a beep and activate the voice dial (see page 18).

Auto switch off

The 🔌 Auto switch off allows you to automatically switch off the phone, either immediately, 30 seconds, 5 minutes or 3 hours after turning the car ignition off.

Auto answer

The 🧍 Auto answer option allows you to select the automatic answering of incoming calls. You can set a delay for automatic answering from 5 to 15 seconds.

🎧 *NOTE:*
   This option is available with a car kit.

Voice keys

The 🎙 Voice keys allows you to set a direct access to several functions by saying the associated word. Using your Hotkeys for the Quick settings, you can activate or deactivate the corresponding function. To program a Voice keys, select in the list the function to program, then follow the on-screen instructions. Press and hold the Pilot key to use your Voice keys.

You can associate the Voice keys to the functions supported by the Hotkeys (see page 41).

Hotkeys

The ☺ Hotkeys menu allows to set a direct access to several functions through a simple long key press (in Advanced mode only).

To program a Hotkey, select a key in the list (from ② to ⑨), then select a function from a carousel displayed on the screen. The ⓪ key is reserved for direct access to the language menu and the ① key to call your voice mailbox.

You can reprogram each key.

You can associate the Hotkeys to the following functions:

Flash dial — Quick dialling of a number stored in the Names list.

Keypad lock — Immediate access to keypad lock.

Activate Silence — Immediate access for the silent feature (vibrator on, ringer volume off, etc.).

Activate Car — Immediate access to the car quick setting (ringer volume high, zoom on and any key answer on).

Activate Headset — Immediate access to the headset quick setting (ringer volume is set to medium and any key answer on).

Meeting — Activates the meeting quick setting (vibrator on, ringer and all keys set to silent).

Activate Outdoors — Immediate access to the outdoors quick setting. The ringer volume is high and keypad lock is on with 1 minute delay.

Activate Normal — Immediate access to the normal quick setting.

Activate Autonomy — Immediate access to the autonomy quick setting. This extends the usable time of the phone's battery (animation off, Vibra on, backlight off, ringer volume medium).

Calculator — Direct access to the calculator.

Redial last num. — Redials the last number dialled.

Reply last number — Redials the number of the last incoming call.

Zoom on\off — Immediate access to the zoom feature.

SOS call — Dials the emergency call number.

Send SMS — Sends a message selected from the messages list.

Read SMS — Direct access to read the messages list.

Show balance — Displays the remaining credit balance.

Accumulated\cost — Displays the accumulated cost of outgoing calls.

Add organiser event Creates an event in the organiser menu.

Show events Displays the event list in the menu.

Record voice memo Records a voice memo.

Play voice memo Plays the voice back.

Fwd to voice mail Forwards all calls to the voice mailbox.

Brick Game Direct access to Brick game

✆ *NOTE:*

Depending on your subscription provider some Hotkeys can be predefined and locked.

Network

The **Network** menu allows manual registering of available networks and the management of your preferred networks.

Register again

The **Register again** menu provides you with a list of the networks available in the area. Select the network you want to register on and press to confirm.

Preferred list

The **Preferred list** menu allows you to build a network list in order of your preference. Once defined, the phone will try to register on a network, according to your preferences.

The following settings are available:
• show the list of preferred networks and:
  - either delete a network from the list,
  - or move a network to a different position in the list,
• add a network to the preferred list from the list of available networks,
• add a network to the preferred list from the list of known networks,
• add a network to the preferred list by entering the network code. This is a 5-digit code:
  - 3 digits for the country followed by 2 digits for the network (67844 for example).

Call settings

The **Call settings** menu allows you to set all the parameters linked to the calls (Call forward, Call waiting, etc.).

Call forward

The ![Call forward icon] menu allows you to divert incoming voice, fax or data calls either to a number in your Names list or to your mailbox.

		SIMPLE MODE ![Simple menu icon] Simple menu	ADVANCED MODE ![Advanced menu icon] Advanced menu
CALL TYPE	![Voice icon] Voice calls	X	X
	![Fax icon] Fax calls		X
	![Data icon] Data calls		X
FORWARD OPTION	![Unconditional icon] Unconditional	X	X
	![Conditional icon] Conditional no reply or not reachable or busy	X	
	![No reply icon] No reply		X
	![No reachable icon] No reachable		X
	![Busy icon] Busy		X

In Simple mode, activating the conditionnal option will divert incoming calls if you don't reply, if you are not reachable or if you are busy. In Advanced mode, you can set any of these options independently.

- **Deactivate**

  The ![Deactivate icon] option allows you to deactivate the status of all call forwarding.

- **Status**

  The ![Status icon] option allows you to display the status of all call forwarding.

Autoredial

The ![Autoredial icon] menu allows you to activate or deactivate the Autoredial feature (in Advanced mode only).

If Autoredial is switched on and if the line is busy, your phone automatically continues to redial this number until a successful connection is made, or until the maximum number of attempts is reached (10).

The phone shall emit one beep at the beginning of each attempt and one special beep if the connection is successful.

Any key answer

The ⠿ Any key answer menu allows you to accept a call by pressing any key, except the ⊙ . This key is used to reject a call (in Advanced mode only).

Call waiting

The Call waiting menu allows you to activate or deactivate an alert beep informing you that you have another incoming call (in Advanced mode only).

All calls

Sets the alert beep for All calls

Voice calls

Sets the alert beep for Voice calls

Fax calls

Sets the alert beep for Fax calls

Data calls

Sets the alert beep for Data calls

Caller ID

The Caller ID menu allows you to choose whether you want to show or hide your identity to your correspondent. The status option will inform you if this function is activated or not. This feature is only available if both the network and your subscription allow it.

Quick settings

The Quick settings menu allows you to access a group of predefined settings. You can use these quick settings to adapt your phone to your environment. You can also associate a quick setting with a Hotkey (see Hotkeys, page 41).

Any change of parameter you may have made in a given quick setting are lost when you select an other quick settings except for the normal setting.

When selecting the normal setting, you will restore all parameters you may have already changed and set in that mode previously.

The Quick settings:

	Normal **	Silent	Autonomy	Headset	Car	Outdoors	Meeting
Vibrator*	Active User program.	Active	Inactive	*	Inactive	*	Active
Ring volume	Medium User program.	Silent	Medium	Medium	Loud	Loud	Silent
Key tones	Active User program.	Inactive	*	*	Active	*	Inactive
Organiser alerts	Active User program.	Inactive	*	*	*	*	*
Battery low alert	Active User program.	Inactive	*	*	*	*	*
New SMS tone	Active User program.	Inactive	*	*		*	*
Alarm clock	Inactive User program.	Inactive	*	*	*	*	*
Keypad lock	Inactive User program.	*	*	*	Inactive	1 minute	*
Backlight	10 sec. User program.	*	Inactive	*	Permanent	*	*
Zoom	Inactive User program.	*	*	*	Active	*	*
Any key answers	Inactive User program.	*	*	Active	Active	*	*
Animation	Active User program.	*	Inactive	*	*	*	*

* Setting identical to the one memorised in Quick Setting Normal

NOTES:

* If you use a Vibra battery.
** There are settings for the parameters when you first switch on the phone. You can update these parameters.

Additional GSM network services (GSM strings)

The phone supports standard GSM strings. These can be sent from the keypad to the network. They are used to activate all supplementary services provided by the network (see your service provider).

Example n° 1: press ✳ ④ ③ # then press 📞 , to activate the Call Waiting service.

Example n° 2: press ✳ # ③ ① # then press 📞 , to know if the mobile identification has been sent.

Example n° 3: press ✳ ⑥ ① # then press 📞 , to activate the feature call forward if no reply.

Example n° 4: press ✳ ⑥ ② # then press 📞 , to activate the feature call forward if unreachable.

Please contact your network operator for any further information on GSM strings.

Query a voice server, a voice mailbox, a messaging service, etc. (DTMF tones)

Some phone services (such as phone answering machines and pagers) require your phone to transmit DTMF tones (Dual Tone MultiFrequency), also known as "touch tones". These are used to communicate passwords, callback numbers, caller choices, and so on.

You can send DTMF tones at any time during a call by pressing any of the keys ⓪ to ⑨ , ✳ and # .

You can also append a DTMF sequence to a phone number before dialling it (or storing it in the Names list). The phone number and the DTMF part must be separated by a wait character.

Pause and wait characters

To obtain a pause or wait character, press and hold # . The display shows w for a wait and p for a pause. The phone always interprets the first pause character as a wait character.

When you dial a number containing a wait character, your phone dials the first part (the phone number) and then waits for the call to be connected before sending the rest of the digits as DTMF tones.

Any subsequent pause character is an ordinary pause that generates a delay of 2.5 seconds.

Interrogating your answering machine (example):

To hear all messages (code 3, say) on your answering machine (password 8421) at phone number 12345678, you could call: 12345678w8421p3.

The phone dials 12345678 and waits for the call to connect. When connected, the phone transmits 8421 (the password), pauses 2.5 seconds, and then sends the last digit.

If you find that 2.5 seconds is not long enough for your needs, you can enter several pause characters one after the other to increase the pause time.

Making a second call

You can make a second call during an active call or during a call on hold. You can switch between the two calls.

- **Dial a number then press** 📞 .
  The first call is placed on hold and the number is displayed at the bottom of the screen. The second number is then dialled.

```
0123456789

       1.29 GBP

  9876543210
```

To toggle between the two calls, press ➡ then select Switch calls.
Each time that you toggle from one call to another, the active call is placed on hold and the call which was on hold is activated.
- **To hang up the active line, press** 🔚 .
  The active line is hung up and the call on hold remains on hold.
- **To end the call on hold, use Switch calls to reach it, then press** 🔚 .

🖐 *NOTES:*

The second number can be dialled either from the keypad or from:
- *the Names list, by pressing ➡ then Names ➡*
- *the Call list, by pressing ➡ , then selecting Call list.*
Depending on the subscriber's card.

⚙ *Answering a second call*

You are able to receive another call when already in communication (if this feature is available on your network). When you receive a second call the phone emits an alert beep and the screen displays `Call waiting` (see Call waiting menu, page 44).

- **If you receive a second call, press ➡ 〔. By moving the Pilot Key, you can:**
    - accept the second call, the first one is put on hold, the second one is active. If you want to toggle between the two calls, press ➡ 〔 then select `Switch calls`. Each time you toggle from one call to another, the active call is put on hold and the call which was on hold is then activated.
    - reject the second call
    - end the active call, then your incoming call is ringing.

CALL WAITING

0123456789

☏ *NOTES:*

1. If you wish also to answer the incoming call, press ☏ , to reject the incoming call, press ☏ .
2. If you have activated call forwarding 'If Busy' (see page 43), you will never receive second calls since they are always forwarded when the line is busy.

⚙ *Answering a third call*

While in communication and one call being on hold, you may receive a third call (if this feature is available on your network).

The phone emits an alert beep. You must end one of the communications before being able to answer the third. This service is limited to two current communications (one active and one on hold).

⚙ *Explicit Call Transfer*

You can connect an active call and a call on hold. You are disconnected when the transfer is complete. During a call press ➡ 〔, select `Transfer` and confirm.

⚙️ *Conference Call*

The user can activate the conference call by making consecutive outgoing calls, or create it from a multiparty call context. The user may have up to five members at the same time. He can endd the conference with ☎ . At this point all calls are disconnected.

When making consecutive outgoing calls, first initiate a normal call with the first number of the conference. Then when the first member is on line, initiate a second call as described in making a second call paragraph page 47.

When the second call is engaged, press the Pilot Key and select 🔗 Conference **.** Repeat the above process up to five members.

If there is an incoming call during the conference call, and if there is less than the five members, by pressing the Pilot key :

You can accept the second call as described in paragraph answering a second call page 47, and

by pressing the Pilot key and selecting 🔗 Conference you can add this member to the conference call.

If there is an incoming call during a conference and if five members are already connected, the incoming call is automatically rejected with a user Busy notification (there is no ringing screen).

⚙️ *In-call symbols*

During calls, you have the following symbols:

📞	**Mute**
ℂ	**Call underway**
⌣	**Active call placed on hold**
)) 📱	**Incoming call**
📱))	**Outgoing call**

Radio wave safety

Your cellular phone is a radio transmitter/receiver. When it is switched on, it transmits and receives radio waves in the frequency ranges of 880MHz to 960MHz. The GSM network controls the power at which the phone transmits. This varies between 0.02 watt and 2 watts.

Public concern has been focused for some time on the possible health hazards for users of cellular phones. The current research on radio wave technology, including the GSM technology, has been reviewed and safety standards have been drawn up to ensure the protection from exposure to radio wave energy. Your cellular phone complies with all safety standards that are defined for it.

The CE mark affixed to your cellular phone means that it is compliant with the European directive on electromagnetic compatibility 89/336/EEC and the low voltage directive 73/23/EEC.

Your phone and its environment

Inadequately protected or sensitive electronic equipment may be affected by radio energy. This interference can lead to accidents. Do not hesitate to ask whether or not your phone can affect surrounding equipment.

NOTE:
To avoid damaging your phone, it must not come in contact with sand or high levels of dust.

Efficient use of your phone

Using your phone in the most efficient manner will improve the performance of your phone, reduce radio energy emission (see "Radio wave safety" on page 50), and reduce battery consumption.

- Always extend the antenna fully before using the phone.
- For your own safety as well as for the optimal operation of the phone, it is advisable to use it only in the normal operating position: place the antenna up over your shoulder while holding the earpiece to your ear.
- For best performance, avoid touching the antenna while a call is in progress.
- Do not use your phone with a damaged antenna. If you touch a damaged antenna, you may suffer a minor skin burn. Have a damaged antenna replaced by a qualified technician. Make sure it is replaced with a genuine manufacturer's replacement part.
- Avoid low reception areas (in a tunnel or between tall buildings for example). In low reception areas the ᛨ symbol on the phone display shows less than the maximum of 4 bars. If possible, move to a different location.
- You should use only your phone manufacturer's accessories. The use of any other

accessories makes all guarantees null and void. Your phone manufacturer will not be held liable for any damage resulting from the use of accessories, other than your phone manufacturer's accessories.

- Do not use battery chargers other than those specified in the manufacturer's catalogue. The use of another charger may be dangerous and will invalidate any type approval given to the phone.

Battery safety

- Use only batteries specified in your phone manufacturer's catalogue. The use of any other accessories makes all guarantees null and void. Your phone manufacturer will not be held liable for any damage resulting from the use of accessories, other than your phone manufacturer's accessories, with your phone.
- Do not allow metal objects (such as keys in your pocket) to short circuit the battery contacts.
- Do not deform or open the battery.
- Do not immerse the battery in water or dispose of the battery in a fire.
- Keep your battery attached to the phone even when discharged to avoid losing your settings, and your back up battery for the clock in the phone will last longer.
- The battery should be recharged at or near room temperature. If the temperature is lower than 0°C (32°F) or higher than 45°C (113°F), the battery icon flashes which means that the battery cannot be recharged.

Safety and security

Responsibility

Your are responsible for your GSM. Careless handling of the phone can result in harm to others and damage to the phone itself. To avoid such problems, read and follow all the security instructions presented here and make them known to anyone borrowing your phone. To prevent unauthorised use of your phone:

- Keep your phone in a safe place and keep it out of small children's reach.
- Avoid writing down your PIN code. Try to remember it instead.
- Switch off the phone if you are going to leave it unused for a long time.
- Use the Security menu (see page 37) to change the security code after purchasing the phone and to activate call restriction options.

Children

Your cellular phone is not a toy. Keep your phone in a safe place and keep it out of small children's reach. Children could hurt themselves or others and they may damage the phone.

Respect of local laws and regulations

Cellular phones can interfere with their environment. Consequently, safety rules and regulations have been created. You should enquire about local regulations when you acquire a cellular phone, and if you wish to use your phone while travelling, you should find out what regulations apply in the state or country you are visiting.

Regulations concerning vehicles and aircrafts are particularly stringent.
Do not switch on your GSM phone in states or countries where no GSM network is available.

Use while driving

Using your phone and driving at the same time can be dangerous as it lowers your concentration.

• Avoid using your phone while driving, except in an emergency.
• In all cases, you should give your full attention to driving. Pull off the road and park before using the phone whenever possible.
• If you want to use your phone while driving a vehicle, install the hands-free car kit which is designed for that purpose.
• Respect the local regulations in countries where you drive and use your cellular phone.
• Check with your car manufacturer that the electronic equipment used in your car will not be affected by the radio energy emitted by your phone.

✆ *IMPORTANT NOTE:*

The use of an alarm system to operate a vehicle's light or horn to indicate incoming phone calls is prohibited on public roads in some countries. Check the local regulations.

ENVIRONMENTAL CARE
Please remember to observe the local regulations regarding the disposal of your packaging materials, exhausted batteries and old phone and where possible promote their recycling.

Philips has marked the battery and packaging with standard symbols designed to promote the recycling and appropriate disposal of your eventual waste.

Battery:
• the crossed-out dustbin signifies that the battery should not be disposed of with general household waste.

Packaging:

• the mobius loop symbol signifies the labelled packaging material is recyclable.

• the green point symbol signifies that a financial contribution has been made to the associated national packaging recovery and recycling system (*e.g.* EcoEmballage in France).

• the chasing arrows symbol on the plastic tray and plastic bag indicate that the materials are recyclable and also identifies the plastic material.

Your phone will give you years of trouble-free service if you give it a little care and attention.
Look after it carefully, keep it clean and dry, and regularly discharge and charge the batteries.

Looking after your phone

Your phone is a highly sophisticated electronic device. Treat it with care.

• Store it in a clean, dust free place. Its moving parts can be damaged by dust.
• Keep it out of hot areas. High temperatures can shorten the life of electronic components, or batteries, and warp or melt certain plastics.
• Do not try to open the phone. If it is not working properly, call the Helpline.
• Use only the manufacturer's genuine accessories, battery and chargers.
• Treat the phone gently and avoid dropping, knocking or shaking it.
• Keep the phone and accessories out of the reach of small children.
• Keep the phone dry and do not use harsh chemicals (such as solvents or detergents) to clean it. To clean the phone, wipe it with a soft cloth slightly dampened with a mild soap-and-water solution.
• Always let your battery discharge completely before recharging it.
• If your mobile is damp, switch it off, remove the battery(see page 12) and let them dry during 24hrs before using it again.

Efficient use of your phone

Your phone has been developed to provide you with outstanding battery performance, at 155 minutes of talk time and approximately 200 hours of standby time with the Slim battery.

Placing and receiving calls consumes the same amount of battery energy. However, the mobile consumes less energy in the idle screen when kept in the same place. When in idle screen and while you are moving, your phone consumes energy to transmit updated location information to the network. Setting the backlight for a shorter period of time as well as efficiently navigating (or avoiding unnecessary navigating) in the menus will also help to save the battery's energy for longer phoning and stand-by performances.

Fixed bars indicate an approximate level of usable energy already charged in the battery. The remaining bars that are not fully charged continue scrolling during the charge process.

Troubleshooting

Problem	⌐☐	Solution
The display shows **BLOCKED** when you switch on.	▶	Somebody tried to use your phone but didn't know the PIN code nor the unblocking code (PUK). Contact your service provider.
The Y and ⩤ symbols are not displayed.	▶	The network connection is lost. Either you are in a radio shadow (in a tunnel or between tall buildings) or you are outside the network coverage area. Try from another place or contact your network operator for assistance or information about the network.
The display doesn't respond (or responds slowly) to key presses.	▶	The display responds more slowly at very low temperatures. This is normal and does not affect the operating of the phone. Take the phone to a warmer place and try again.
Your phone does not go to idle screen.	▶	• Either press and hold ⓒ . • Or switch off the phone, check that the SIM card and the battery are installed correctly, and switch it on again.
When charging your mobile phone, the battery icon is empty and flashing.	▶	When your battery is too low or when the temperature is out of the range (0 to 45°C), the battery cannot be charged. Move your phone to a place where the temperature is in the range and wait a few minutes before re-charging.
Flashing of the backlight and the battery fixed icon. A continuous alert beep is emitted and the message **Accessory not compatible. Please unplug** is displayed on the screen.	▶	Unplug the charger and use a Philips Authentic Accessory.
After switching on your phone, the SIM lock code is required.	▶	Your phone is configured to work only with your service provider's SIM card. Please contact your service provider to get further informations.
Your phone does not work well in your car.	▶	A car contains some metallic parts that absorb electromagnetic waves which can affect the phone's performance. A car kit is available to provide you with an external antenna and enables you to phone without handling the handset. It is strongly advised, however, to check with local authorities if you are allowed to phone while driving.

Maintenance

Problem	🔑	Solution
Difference between a long press and a short press on numeric keypad.	▶	A short press displays the number written on the key. A long press (at least one second) could either activate a Hotkey (See Hotkeys page 41) or a special character (such as **+** for a long press on the ⊛ key).
The time and the date are reset.	▶	Your mobile phone contains a small battery called the « back up battery » which is charged by your main battery. If you unplug the main battery, the back-up battery can supply the clock with enough energy for approximately 7 hours, if it is fully charged. To set time and date, see page 39.
Your phone does not display the phone number of incoming calls.	▶	This feature is network dependent. The network, therefore, may not send the caller's number to your mobile and the phone will display **Call 1**. Please note that this feature is network dependent. Please contact your operator to get further information.
When attempting to use a feature in the menu, the mobile displays **not allowed**.	▶	Many features are network dependent. They are only available, therefore, if the network or your subscription supports them. Please contact your subscription provider for more information.
When trying to send a message.	▶	Some networks do not allow message exchanges with other networks. Please contact your subscription provider for more information.
Your phone does not switch on.	▶	Remove the battery (see page 12). Check that both the contacts of the phone and those of the battery are not damaged. Plug in the battery, making sure that it is fitted securely (see page 3). Charge the mobile until the battery icon has stopped flashing. Then unplug from the charger and try to switch the mobile on.
You are uncertain that you are properly receiving calls on your mobile.	▶	Make sure the feature of « conditional call forward» as described on page 43 is deactivated if you wish to receive your calls. This network dependent feature may display the following icons: 🔁.
The display shows **SIM FAILURE**.	▶	Your SIM card may be damaged. Please contact your network operator.
The display shows **IMSI FAILURE**.	▶	This problem is related to your subscription. Please contact your network operator.
The display shows **insert your SIM card**.	▶	Check that the SIM card has been inserted in the right position (see page 3). If the problem remains, your SIM card might be damaged. Please contact your network operator.

AUTHENTIC ACCESSORIES

**"When Performance Counts ...
Philips Authentic Accessories are Designed to Maximize the
Performance of Your Philips Phone."**

BATTERIES

Slim Battery:
- A Lightweight power pack-easy to insert and go.
- Powerful Lithium Ion battery delivers at least 155 mins of talk time or 9 days of standby time*.

BIX 158/P
9911 240 33029

Vibra Battery
- Silent vibration alerts you to incoming calls.
- Powerful Lithium Ion battery delivers at least 230 mins of talk time or 14 days of standby time*.

Talk and standby time are network and usage dependent, differences between networks may exist.

BVX151/P
9911 240 33032

CHARGERS

Cigarette Lighter Adapter 12-24V
- Charges the Battery while you use the phone.
- Plugs into virtually any vehicle power outlet.
- Allows you to make an essential call if your battery is out of power.

CKLR 12/P
9911 240 34118

CHARGERS

Fast Travel Charger
90-240V

- Charges your battery wherever there is an AC outlet.
- Small enough to carry in a briefcase or handbag.
- Charging time between 75 and 120 minutes*.

Europe :
ACSR 12/P
9911 240 30042

Taiwan/USA :
ACTR 12/P
9911 240 30043

UK :
ACUB 12/P
9911 240 30044

Australia :
ACAR 12/P
9911 240 30045

Desktop Charger
90 – 240V

- Compact and convenient solution to charging your phone and spare battery.
- Compatible with Philips Authentic Fast Travel Charger and Cigarette Lighter Adapter.
- Charges the batteries between 75 and 120 minutes*

DTEX15/P
9911 240 35136

⊖ NOTE

Approximate times depending upon battery type and usage.

HANDS-FREE KIT

Deluxe Hands-Free Car Kit

- Full duplex hands-free car kit designed and engineered for convenient and safe hands-free use.
- Features: Philips Authentic Cradle with built in Fax/Data Port, Voice recognition, Auto Volume Control, Auto Answer, Radio Mute, Additional Ringer Melodies and Privacy Mode (with optional handset).

CKFX 15/P
9911 240 34422

⊖ NOTE

In certain countries, telephoning while driving is prohibited.
For safe and trouble free installation, we recommend that specialized technicians install Hands-Free Car Kits.

HANDS-FREE KIT

Easy Hands-Free Car Kit
- Complete hands-free solution with an advanced designed speaker and microphone.
- Easy to install - simply plug into the vehicle power outlet.
- Features : Philips Authentic Phone Cradle, Volume and Privacy mode and Battery Charger.

CKHX 15/P
9911 240 34421

Hands-Free Headset
- Use your phone under almost any condition with this hands-free very mobile solution.
- You can talk hands-free whether you're at home, in the office or on the move.

HSSR 12/P
9911 241 30017

Deluxe Hands-Free Headset
- Provides the same features as the Hands-Free Headset.
- Additional In line answer button offers you a simplified alternative to search for the phone keypad : you answer an incoming call just by pressing the button and in idle mode a long press on it activates the voice dial.

HSSX 15/P
9911 241 30018

CARRY POUCH WITH BELT CLIP

- Protects your phone from nicks and scratches.
- Click-Lock belt clip makes your phone secure and easy to carry.
- Expandable to accommodate Vibra or Slim Batteries.

CBXX 15/P
9911 240 37026

Philips Authentic Accessories

SINGLE DATA CARD

- When connected to a Philips mobile phone, the Single Data Card allows you to send faxes, SMS messages and access data communications facilities on mobile networks.

DCG7AS/ P

To maximize the performance of your phone and not void the warranty, always purchase Philips Authentic Accessories that are specially designed for use with your phone. Philips Consumer Communications cannot be held liable for any damage due to use with non authorised accessories.

Ask for Philips Authentic Accessories where you purchased your Philips Phone.
